Since its founding in 1938, Detroit Diesel has produced more than 5 million units, of which at least 1 million is still in operation. In 1965, Detroit Diesel went into "free swimming", and in 1970 entered a new stage of development, merging with the developer of gas turbines Allison Division. In 1987, the company revolutionized the market by launching a series of power units with electronic control system DDEC. The innovation allowed to reduce the consumption of oil and fuel, and automate the work of engines. Some series for example, S50, S149 are no longer produced, but the company continues their service. The most popular among the manufacturers of equipment are the following product lines. The series immediately received electronic control and is characterized by economy and low level of vibration. The power range is 9515846 hp.

I sold mine several years ago and all the manuals went with it. Pretty reliable old beast though, as long as you werent in a hurry. Ive been googling around and found that it was included in a Canadian run of Bombardier M35A trucks but havent found much else on the humvee front. Also, I dont have any experience looking for old military documentation. Do you have a site recommendation.I think you would search for the manuals for an early 80s Humvee, which wikipedia suggests would be a M998 A0 series HMMWV.Boat 42 Sportfish.
