BY DETROIT HOIS T PAGE 3 W ir e Rope Hoists to 50 T on Capacity Hoist Model HP Capacit y Ton

Lifting Speed FPM Lifting Height FT Max. The brake features a spring design with a minimum of 18 brake elements for the smallest load brake size. The locking mechanism is designed to last the lifetime of the hoist. Motor Brake DC rectified double sided disc brake, heavy duty brake coil, premium asbestos free brake linings, for long life and low maintenance. Hoist Motors Heavy duty, cast iron frame, design D, class F insulated, 60 minute rated motors are totally enclosed, fan cooled and provide protection against vapors, dust and abrasives. Rated for Class I, Division 2 hazardous areas. Built in thermal sensors guard against overheating. Hoist Gearbox Totally enclosed gear case with oil level sight glass, lifetime lubricated gear train. Forged alloy gears, helical cut, no over hung loads, no couplings, 3rd gear has spline output shaft to connect directly to drum spline input. Designed to A GMA standards. The load block frame is a weldment with the hook saddle secured by shear pins. Sheave covers are machined from rugged castings. The hook rotates 360. Optional rope guides ensure that ropes remain safely and securely seated in drum grooves. New Rope Equalizer Pivot Lever System Patent pending Ask for our special bulletin describing benefits of this system for new and existing wire rope hoists. Hoist Controls NEMA 1 2 sheet metal enclosure to suit most indoor environments are standard. NEMA 4 or NEMA 7 enclosures are available for special environments. Rope wedges lock the rope securely into wedge pockets at rope termination points. Drum diameters and groove depths meet the recommendation of HMI and other international standards. Drum spline connects directly to the gearbox output spline. Spline connection covered by lifetime warranty.
