In connection with your request, I have reviewed those materials and spoken with those individuals that I have deemed appropriate. You have asked for specific information related to our recent action involving Western Union. No, there is no obligation to file a CTR under Part 300 or any other banking regulation. Part 300 is more akin to the federal suspicious activity reporting obligation though Part 300 is much narrower in scope. Part 300 was applicable in the Western Union matter because there were instances of misconduct on the part of Western Union agents and Western Union the licensee did not file the required Part 300 Form with respect to those agents.<http://www.sensi-leszno.pl/userfiles/brady-1344-printer-manual.xml>

The indoor separated combustion duct furnace was designed as a buildings primary room heating source and is certified for, non residential, commercial applications only. Separated combustion duct furnaces are specifically designed for buildings with hostile atmospheric conditions such as high humidity, contaminated indoor air or rooms with negative pressure. Available in 11 power exhausted model sizes, the unit covers a wide variety of applications. Airflow direction can be specified for location downstream from the dehumidifier and has a drain pan that allows connection to a condensate drain line. There are many other options available including various types of gas valve controls to suit specific requirements. For higher elevations, the input rating should be reduced at the rate of 4% per 1000 feet elevation above sea level. For Canada, in elevations between 2000 and 4500 feet, the unit must be derated to 90% of the rating listed above. Field conversion of a high air temperature rise to a low air temperature rise unit or the opposite requires a factory supplied conversion kit. Many times a portion of the total discharge air, from the dehumidifier into the gas duct furnace, must be diverted around the duct furnace with a field supplied duct controlled with a hand damper to achieve the desired air flow through the gas duct furnace. The control step down transformer includes damper actuators, ignition controllers, gas valves, control relays, amplifiers, and motor starters. Combustion air pipe installed inside collar.
