Van egy EPSON STYLUS DX5050 nyomtató, amit kaptam, viszont nincs telepítolemezem, driverem hozza. WINDOWS 10 32bit operációs rendszerhez kellene. Ha van valakinek, kerem segítsen, mindenfajta megoldás érdekel. Köszönöm előre is a segítséget! Epson Wf 2630 univerzális nyomtató patroncsere után kódot ker. Tisztelt tanyalokok. Egy kis segítségre lenne szükségem. A fenti Epson nyomtató az unokámé és patron csere után nem lehet elindítani valami kódot ker de sehol nem találok ilyent. A nyomtató három éves eddig simán lehetett patron csereelni benne már két garnitúra patron vettünk de nem megy. UdV. Jenő A téma címe tartalmazza a hibás eszköz markáját és típusát. Szintén tartalmazza röviden a problémát. Felfüggesztett állapotban nem tudnak mások addig hozzászólni, amíg ki nem javítod a címet. A fekete az elején meg majd nem tele volt. Ha színes nyomtatás allásban van a 3 színből keveri a feketét rendszeren, kepeket is szépen nyomtat, fekete allásban viszont nem csinál semmit. A gép észre sem veszi, hogy nem nyomtat. Teszi a dolgot, csak éppen semmi nyom nem látszik a papíron. Gondoltam megjárom, nyomtattam vele kb 20 teljesen fekete oldalt. Persze semmit nem nyomtatott a papírokra, viszont az érzékelője szerint fogyott belőle a fekete festék. Mi lehet a baja. <http://sunwoodrealestate.com/sunwood/img/userfiles/braille-transcriber-manual.xml>

A fej fekete része be van szaradva Köszönöm a segítséget. Ede EPSON Stylus Office BX310 nem ismeri fel a patronokat Szép jó estét mindenkinek! Fenti multifunkciós nyomtatóval akadtam meg, ha valaki tudna segíteni megköszönöm. A probléma a oldalában lévő vezérlőpanelen történt két tranzisztór C6082 és A2210 csere után jelentkezett. Előtte semmit nem csinált, mert mind a két tranyó zárlatos volt és leültette a tapot. A csere után a tap megjött kb. 41V. Szépen összeraktam. Masoltam vele 45 oldalt. Ezt látszólag hiba nélkül megcsinálta. Ez után masolás közben elakadt ketszer, a harmadik próbálkozást már nem engedte, Erdemes ezzel foglalkozni. When you receive the kit, check that all of the following are included. Use a slotted screwdriver if

necessary. If the printhead is replaced without following the instructions, the performance of the printhead cannot be guaranteed. Step 2 Open the cover, then remove the ribbon cartridge. Step 2 Open the cover, then remove the ribbon cartridge. Step 4 Disconnect the three head cables from the connector. Remove the cable protection sheet too. Set the cable of the paper width sensor as shown in Figure 310. After installation, check that the ribbon mask is a little loose. Step 12 Install the new printhead torque the screws to 12 kg.cm. Replace the head cable protection sheet with a new one, then connect the head cables to the connector. Refer to section 3.2.3.1 for removing the top cover. Otherwise, the AC input could short and burn. Power Switch Wiring Diagram Remove the right side cover in the same way. Step3 Disconnect the cables from the power switch at the CN 1 on the power supply board. Step4 Disconnect the cables See Figure 3 15 from the AC inlet at the power switch. Remove the screws from the right hinge also. Refer to section 3.2.3.1 for top cover removal. Remove the two CBS 0 M3 X 6 screws used to fix the earth lines of the standard parallel and optional interface. Withdraw the cables from the driver board at the left side of the printer mechanism. A, B, C in figure below Disconnect connectors CN8and CN9 from the left side of the main board, step 3 Remove the two CBBM4 X 10 screws holding the upper panel and raise it. Withdraw the cable from the gap between the lower case and the upper case. Step 4 Remove the six CBBM4 X 16 screws and two CBBM3 X 10 screws holding the upper housing and raise it. Withdraw the CN9 cable from the gap between the lower case and the upper case. Draw the bottom panel 5 inches toward you while keeping it erect. Slowly turn the bottom panel down towards you. Step 10 Disconnect the cable from connector CN2 on the main board.

Step 3 Remove the three CBB M3 X 12 screws fixing the driver board to the base plate, and ren the driver board. Please check your inbox, and if you can't find it, check your spam folder to make sure it didnt end up there. Please also check your spam folder. Two people should carry it by the bottom, as shown here The power supply voltage is shown on the label on the back of the printer. If the voltage shown is not correct for your country, contact your dealer. It is not possible to adjust the printer for use with different voltages. Your printer may also be protected by several pieces of foam packaging. These protective items must be removed before you turn on the printer. After removing the protective materials as described below, store them with the other packaging material. Remove any packing materials in the printer. Then lift up the paper bail and remove the piece of foam packing underneath it. Accidental interruption of power can wipe out information in your computer's and your printer's memory. The printer should always be kept level. Also, check to see that the distance between the stand supports is wide enough to accommodate the paper you will be using. If possible, fasten the cables to the printer stand to keep them away from the paper. Then detach the ribbon guide from the ribbon cartridge but not from the ribbon and turn the ribbontightening knob in the direction of the arrow to take up any slack in the ribbon. Pulling the cartridge toward you, slide the hooks in the sides of the cartridge over the two corresponding pins in the printer. Then push the cartridge down into position until the other two hooks snap into place over the mounting pins in the The smaller end of the guide should be on top, with its angled edge toward the platen. Turn the ribbontightening knob again to remove any slack in the ribbon. You should perform this test to make sure that your printer was not damaged during shipping and that the ribbon is correctly installed.

Lock it in place by pushing the sprocket lock lever up. Then close the sprocket covers. The side of the paper that you want to print on should be facing you. This loads the paper automatically. The self test continues until the paper runs out or you press the ON LINE button. If the test results are not satisfactory, see page l24 for possible causes and solutions. Then open the paper separator cover the back flap of the top cover and tear off the paper at the perforation. Rapidly switching the Power on

and off. A worn ribbon can damage the print head and should be replaced. Install a new ribbon cartridge as soon as possible. See page 64. Stop printing, turn off the printer, and reinstall the ribbon cartridge. See page 19. Turn off the printer, remove the ribbon cartridge, and then reinstall it. See page 111. Stop printing and contact your Epson dealer to have the print head replaced. If you are not sure which one is required by your computer, check your computer manual. If your computer requires another type of interface, you need to use an optional interface board. See the section on interface boards in Chapter 5. If you need to use the built-in serial interface, be sure to change the DIP switch settings as shown in Chapter 3. This may damage the printer. Insert the cable in This may damage the printer. Insert the cable in the plastic clamp and close the clamp. My client put the printer in stock for spare and when he used the printer in production, he had the pb. But after the three months warranty. See they have all service manuals and service programs. Due to them I fixed the same error on me C20. They are friendly! I tested with an other Left end carriage home sensor I had the same problem. And the carriage motor, can it cause the 2 sets of three beeps Ill be very greatfull, im a Technician repairing computer equipment in Harare, Zimbabwe. Thanks a lot. Mushingi The DFX8000 uses beep codes as service error indicators.

If you try turning it on earlier, the internal timer may simply add more time to the internal counter and then you'll have to wait even longer. So I tell my customers to wait 10 minutes before they try turning the printer back on again. However, if you switch off the printer, prior to those 12 seconds having elapsed, then you can turn it right back on. That tip helps, while you are trying to count that beep code pattern. Let us know what the actual beep code pattern is and if we can help you further, we will try. Good Luck! Denny Conway Can anyone assist on this one, Im now i tried adjusting my encoder motor but without success. Thanks Mushingi Anonymous I changed the driver board but the problem still persists. If anyone can help i will be happy Bagger Bagger. We have 149 Epson Diagrams, Schematics or Service Manuals to choose from, all free to download.
