Set the power switch to. p.31 5Focus the subject. p.33 Look through the viewfinder and aim 7 the viewfinder center over the subject. Press the shutter button halfway, and the camera will focus the subject. Take the picture. p.33 Press the shutter button completely to 8 take the picture. Review the picture on the LCD monitor. p.94 9 The captured image will be displayed for about 2 sec.

on Creative Zone These modes give you more control over the result.Fully automatic shooting for specific kinds of subjects. 1 Full Auto p.40 Image Zone 2 Portrait p.43 3 Landscape p.44 4 Clo. That's a responsibility we take seriously, one that deserves the best effort were capable of.Exposure modes are divided into three zones Image, Basic, and Creative. Finally, the Creative Zone refers to the Program AE, Shutter Speed Priority AE, Aperture Priority AE, Manual, and Auto Depth of Field Priority AE exposure modes. In AperturePriority and ShutterPriority modes, this dial sets the lens aperture or shutter speed. In Program AE mode, turning this dial selects between a range of equivalent exposure settings. When turned while pressing a control button such as the Drive Mode or Exposure Compensation buttons, this dial adjusts the selected setting. Manual exposure mode, it causes the exposure readout to show how much overThe lens can then be removed by rotating it about 45 degrees to disengage the bayonet mounting flanges. LCD monitor, this button lets you adjust the exposure compensation from 2 toOptions are Single Shooting, Continuous Shooting, and SelfTimer drive modes. Program AE, ShutterPriority AE, AperturePriority AE, or Manual Exposure modes. Pressing the button and rotating the Main dial cycles through an automatic setting,The automatic settingWhen connected to a Canon printer, the print options are considerably expanded. LCD monitor in shooting mode, turning it on or off. LCDbased operating menu in all modes. Pressing the Menu button a second timeOnce pressed, a jump bar appears in the LCD screen, and jumping is controlled by pressing the right or left arrow keys. The Jump button is active only in Playback mode. Playback mode can be canceled by hitting the Play button again, or by touching. Its always ready to shoot a picture, regardless of its current mode. SimplyThere is also an option to cancel.

The Erase function works in Playback modeAs the cameras main navigational tool, the keypad selects various camera settingsIf an image has been enlarged, all four arrow keys pan the view of the enlarged image. When pressed on its own, outside of a menu option or control option, the Set button displays the Picture Style menu, with choices for Standard, Portrait, Landscape, Neutral,

Faithful, Monochrome, or three User Defined settings. Canon. At higher ISO values, you need less light to expose an image. See Figure 58 for a reminder of what that defect looks like. You have no control over ISO in those exposure modes. In the advanced exposure modes, you can specify an ISO setting from 100 to 1600. To adjust the setting, just press the top cross key — the one that sports the label ISO. You then see the screen shown on the right in the figure. Use the cross keys or rotate the Main dial to highlight your choice. Then press the Set button. The longer the exposure, the greater the chances of this digital defect, which gives your pictures a mottled look. This feature is provided through a Custom Function, however, which means that you can access it only in the advanced exposure modes. To check it out, visit Setup Menu 2, select Custom Functions, press Set, and then use the cross keys or Main dial to select Custom Function 2, as shown in the figure here. Press Set again to activate the scrolling list of options in the middle of the screen. You can choose from these settings This is the default setting. First, the filter is applied after you take the picture, as the camera processes the image data and records it to your memory card. The time needed to apply the filter is about the same as the original exposure time, which slows down your shooting speed. Don't expect this process to totally eliminate noise, and do expect some resulting image softness.

You may be able to get better results by using the blur tools or noiseremoval filters found in many photo editors because then you can blur just the parts of the image where noise is most noticeable — usually in areas of flat color or little detail, such as skies. The following things then take place In ADEP mode, the camera forces you to use its selected exposure settings. You can, however, tweak the exposure by using the exposurecompensation feature discussed in the next section. To select a different combination, rotate the Main dial. As you change the shutter speed, the camera automatically adjusts the aperture as needed to maintain the proper exposure. Also note that in extreme lighting conditions, the camera may not be able to adjust the aperture enough to produce a good exposure at your current shutter speed — again, possible aperture settings depend on your lens. So you may need to compromise on shutter speed or, in dim lighting, raise the ISO. Rotate the dial to the left to open the aperture to a lower fstop number. As you do, the camera automatically adjusts the shutter speed to maintain the exposure. And if your scene contains moving objects, make sure that when you dial in your preferred fstop, the shutter speed that the camera selects is fast enough to stop action or slow enough to blur it, if that's your creative goal. That's your cue as to the aperture-related function of the button — Av stands for aperture value. Don't let up on the button as you rotate the Main dial — if you do, you instead adjust the shutter speed. If you don't agree with the camera, you have two options You can switch to Manual exposure mode and simply dial in the aperture and shutter speed that deliver the exposure you want; or if you want to stay in P, Tv, Av, or ADEP mode, you can tweak the autoexposure settings by using the feature explained in the very next section. Was this article helpful A Hands On Guide On Flash Photography For Camera Friendly People!.

Learn Flash Photography Essentials By Following Simple Tips. Get My Free Ebook. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with Canon Digital Rebel Guide. To get started finding Canon Digital Rebel Guide, you are right to find our website which has a comprehensive collection of manuals listed. Either way, you get great pictures! In these modes, you can choose between automatic or manual focusing, but you have little or no control over most other picture-taking settings. The following table shows you that you can adjust aperture fstop to manipulate depth of field the zone of sharp focus and adjust shutter speed to determine whether moving objects appear sharply focused or blurry. In all five modes, you also can tweak color, ISO light sensitivity, and exposure. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with Canon Xt Manual. To get started finding Canon Xt Manual, you are right to find our website which has a comprehensive collection of manuals listed.
