You can write in English language into the forum not only in Hungarian. These symbols are internationally accepted symbols taht warn of potential Power Sources The appliance should be connected to a power hazards with electricalWe recommend that you become better acquainted with us, and what we have to offer by going through this User's Guide with your RP50 in front of you. It is your key to unlocking the potential within the RP50.The Up Footswitch increments, and the Down Footswitch decrements through the presets. Pressing both Footswitches simultaneously bypasses the selected preset.In Play mode, these buttons control RP50's Master Level. In Edit mode, these buttons adjust the selected effect. These buttons also change the Pattern,Tempo, and Level of the Drum machine when it is turned on.Connect from this jack to the input of a single amplifier for mono applications, or use a TRS stereo "Y" cord to connect to the inputs of 2 amplifiers for stereo applications. This jack also can be used as a headphone jack. Note When using the RP50 direct into a mixer or recording device, or when using it with headphones, you can enable the Global Cabinet Modeling feature to emulate speakeThe following diagrams show the connections for some of these options. Before connecting the RP50, make sure that the power to your amplifier is turned off, and the power to the RP50 is disconnected.There is not a power switch on the RP50. To turn the RP50 off, disconnect your instrument from the Input Jack for battery power or disconnect the optional PS200R power supply from the Power Jack or fromConnect a TRS stereo "Y" cord or a pair of stereo headphones to the RP50's Output. When using a "Y" cord, connect one end of the "Y" cord to the input of one amplifier or channel of a mixer. Connect the second end of the "Y" cord to a second amplifier, or second channel of a mixer. If connecting to a mixing console, set the pan controls of the mixer hard left and right to retain stereo separation.

To emulate a guiBefore applying power to anything, set your amps to a clean tone and set the tone controls to a flat EQ response on most amps, this would be 0 or 5 on the tone controls. Battery Power The RP50 can be run for more than 15 hours on 6 AA batteries.The battery compartment is located on the bottom of the RP50. The following diagram shows how to install the batteries. Note Pay cloDisconnecting your instrument from the Input of the RP50 disconnects the battery power. Turn your amplifiers on and adjust the volumes to a normal playing level. To prolong the battery life, disconnect your instrument from the RP50's Input when not in use. AC Power The RP50 can also be powered with the optional PS200R power supply. Connect the plug of the PS200R power supply to the power jack on the rear panel of the RP50. Connect tEnter the Tuner by pressing and holding both Footswitches simultaneously. The tu briefly displays indicating that you are in Tuner mode. To begin tuning, play a note on your guitar the neck pickup usually works best. The display shows the note being played. The Effect LEDs indicate whether the note is sharp or flat. The right 6 red LEDs indicate the note is sharp and should be tuned down. The left 6 red LEDsExit tuner mode by pressing either Footswitch. The tuning reference is retained when the unit is turned off. Bypass The RP50 presets can be bypassed for a clean, unprocessed guitar tone. To bypass the RP50, press both footswitches simultaneously. The display reads By indicating the preset is bypassed. Press either footswitch to exit Bypass and return the the last selected preset.The Edit buttons move you through the Effect modules. The LEDs light indicating which effect group is selected. Each effect has multiple settings to select from. The Value buttons are used to change the value for the selected effect. As a button is pressed, the value or status is shown in the display.The display flashes. 3. Press the STORE button again to save your changes.

2. Use the footswitches to select the preset location you want to store your changes to. 1. Press the STORE button once. The currenEach effect within the RP50 can be programmed to suit your

personal application. Understanding how these effects alter the sound helps you achieve the sound you are looking for. The following overview of the RP50's effects outlines what each effect does.HS Gives a humbucker the unique sound of a single coil. Cr Cry Wah is a traditional sounding Wah.Fr Full Range Wah sweeps the entire spectrum of audible frequencies. Compressor A Compressor is used to automatically limit theThe EQ in the RP50 is similar to the tone knobs on an amplifier. Values 14 cut the level of each band, 5 is flat no cut or boost, and values 69 boost the level of each band. Bass b1 b9 The Value buttons adjust the amount of low end enhancement Bass. Mid d1 d9 The Value buttons adjust the amount of mid range enhancement. Treble t1 t9 The Value buttons adjust the amount of high end enhancement Treble.The delayed signal is modulated in and out of tune and then mixed back with the original signal to create a thicker sound, and stereo image. Use the Value buttons to select one of the nine Chorus settings. Flange F1f9 A Flanger uses the same principle as a Chorus but uses a shorter delay time and adds regeneration or repeats to the modulating delay. This results in an exaggerated up and down sweeping motion to the effect. Use the Va. Creators are allowed to post content they produce to the platform, so long as they comply with our policies. United Kingdom. Company number 10637289. The lightning flash means that there are dangerous voltages present within the unit. The exclamation point indicates that it is necessary for the user to refer to the owners manual. These symbols warn that there are no user serviceable parts inside the unit. Do not open the unit. Do not attempt to service the unit yourself. Refer all servicing to qualified personnel. Opening the chassis for any reason will void the manufacturers warranty. Do not get the unit wet. If liquid is spilled on the unit, shut it off immediately and take it to a dealer for service. Disconnect the unit during storms to prevent damage. Power Sources The appliance should be connected to a power supply only of the type described in the operating instruction or as marked on the appliance. Grounding or Polarization Precautions should be taken so that the grounding or polarization means of an appliance is not defeated. Power Cord Protection Power supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance. Servicing To reduce the risk of fire or electrical shock, the user should not attempt to service the appliance beyond that described in the operating instructions. All other servicing should be referred to qualified service personnel. For units equipped with externally acessible fuse receptacles Replace fuse with same type and rating only. Electromagnetic CompatibilityOperation is subject to the following conditions This device may not cause harmful interference This device must accept any interference received, including interference that may cause undesired operation. Use only shielded interconnecting cables.

A Return Authorization number may be obtained from Digitech by telephone. The company shall not be liable for any consequential damage as a result of the products use in any circuit or assembly. 4. Proofofpurchase is considered to be the burden of the consumer. 5. Digitech reserves the right to make changes in design, or make additions to, or improvements upon this product without incurring any obligation to install the same on products previously manufactured. 6.The consumer forfeits the benefits of this warranty if the products main assembly is opened and tampered with by anyone other than a certified Digitech technician or, if the product is used with AC voltages outside of the

range suggested by the manufacturer. 7.The foregoing is in lieu of all other warranties, expressed or implied, and Digitech neither assumes nor authorizes any person to assume any obligation or liability in connection with the sale of this product. In no event shall Digitech or its dealers be liable for special or consequential damages or from any delay in the performance of this warranty due to causes beyond their control. NOTEThe information contained in this manual is subject to change at any time without notification. Some information contained in this manual may also be inaccurate due to undocumented changes in the product or operating system since this version of the manual was completed.The information contained in this version of the owners manual supersedes all previous versions. IntroductionThanks to the continuous advances in musical technology, the RP50 offers you the flexibility, power, and capability of producing sonic creations never before thought possible. We recommend that you become better acquainted with us, and what we have to offer by going through this Users Guide with your RP50 in front of you. It is your key to unlocking the potential within the RP50.

Included Items Before you get started, please make sure that the following items have been included RP50 Warranty Card The utmost care was taken while your RP50 was being manufactured. Everything should be included and in perfect working order. If anything is missing, contact the factory at once. Please help us become acquainted with you and your needs by completing your warranty card or registering online at It is your safeguard should a problem arise with your RP50. 1 The Front Panel 6 5 7 3 4 2 11. Footswitches These 2 Footswitches are used to select presets, access the Tuner, or bypass the RP50. The Up Footswitch increments, and the Down Footswitch decrements through the presets. Pressing both Footswitches simultaneously bypasses the selected preset. Pressing and holding both Footswitches accesses the Tuner. 2 2.Value Buttons The Value Buttons perform various functions depending on which mode is selected. In Play mode, these buttons control RP50s Master Level. In Edit mode, these buttons adjust the selected effect. These buttons also change the Pattern,Tempo, and Level of the Drum machine when it is turned on. Press the left and right Edit buttons to move through the effects. Each effect LED will light to indicate which effect you are editing 4. Drums The Drums button is used to turn on and off the RP50s drum machine. When the Drums feature is active, the Drums LED lights and the selected drum pattern plays continuously. 5. Effect LEDs The Effect LEDs provide information regarding the current preset. In Edit mode, the LEDs indicate the effect selected for editing. In Tuner mode, the LEDs indicate whether the note played is sharp, flat, or in tune. 6. Display The Display provides information for different functions depending on the selected mode. In Play mode, the display shows the selected preset number. In Edit mode, the display shows the value of the parameter being adjusted. When the Tuner is enabled, the display shows the note played. 7.

Store The Store button saves your custom edits to the user presets. 3 Rear Panel1 2 3 4 1. Input Connect your instrument to this jack. 2. Output This is a stereo TRS jack. Connect from this jack to the input of a single amplifier for mono applications, or use a TRS stereo Y cord to connect to the inputs of 2 amplifiers for stereo applications. This jack also can be used as a headphone jack. Note When using the RP50 direct into a mixer or recording device, or when using it with headphones, you can enable the Global Cabinet Modeling feature to emulate speaker simulation on each of the RP50s presets. See Page 20 for more on Global Cabinet Modeling. 3. Control In Connect a passive volume pedal to this jack to control Volume, Wah, and Whammyin the RP50. 4. Power Input Connect only the optional DigiTech PS200R power supply to this jack. 4 Making ConnectionsThere are several different connection options available when using the RP50. The following diagrams show the connections for some of these options. Before connecting the RP50, make sure that the power to your amplifier is turned off, and the power to the RP50 is disconnected.There is not a power switch on the RP50. To turn the RP50 off, disconnect your instrument from the Input Jack for battery power or disconnect the optional PS200R power supply from the Power Jack or from the AC outlet. Mono OperationConnect your guitar to the Input of the RP50. Connect a TRS stereo Y cord or a pair of

stereo headphones to the RP50s Output. If you are here, it was rather the case. However, you are not the only person having problems with keeping the operation manual of all household devices. Below are few guidelines regarding how and why you should collect the product manuals. However, we believe that the manuals should include the most important and needed information about DigiTech RP50, not to discourage the user to read.

Obviously, if a device DigiTech RP50 has multiple advanced functions, we will not avoid a high amount of information in this document. Then, it will be much easier to find it than look through the purchase boxes which have already been thrown away by you or any other of household members. It will be enough to clear the drawer once in a year and throw away any manuals of the devices you do not use anymore. Thus, you can avoid storing any unnecessary documents and keep only those which are valid. You can also download and print the manual DigiTech RP50 to place it in your drawer.
