A wide variety of disc formats are supported, including audio CDs, Video Cds, data discs and more. Operation is simple and completely automatic once a This Operators Manual is a complete

stepbystep guide to quickly and easily create discs with your new Optical Disc Publisher. Click the icon in the software to access the help file. Please note that in order to copy and record DVDs, you will need to have purchased the DVD version of the Publisher. Make sure that all supplied accessories are included with your unit. The LED Status Lights indicate that Power is ON. They also blink in certain patterns to indicate an error or other condition of the Publisher. See Section 5 for a full explanation of the LED Status Light conditions. When the front cover is closed, pressing the Ink Cartridge button will open or close the Printer Tray. The bins will hold up to 50 discs. The rightside bin is the Input Bin for blank media; the leftside bin is the Output Bin for finished discs. The discs slide down the ramp out in front of your Publisher. Heres what you need in order to successfully copy discs at 8x or above with the PrimoDVD 2.1 software Heres what you need in order to successfully burn and print with the Discribe software. It should be connected directly to an onboard USB 2.0 port. Then, the Robotic Disc Transporter will pick a disc from the Input Bin. If a disc does not record properly meaning that all or part of that disc is not recordable, the Robotic Disc Transporter picks it out of the CD Tray and sends it to the Reject Area. If you were to fully record a CD with data, audio, video or music 650 MB, recording time is about 3.Most jobs dont fill the entire disc, so recording time is usually less than this. After recording, the bottom Recorder Tray opens automatically. The Robotic Disc Transporter will lift the disc out of the Recorder Tray. The Recorder Tray will close, and the Printer Tray will open.

http://genialica.com/images/Dimplex-Lym28E-Manual.pdf

The Robotic Disc Transporter will lower the disc into the Printer Tray, and the Printer Tray will then automatically close. The Robotic Disc Transporter will now pick the second disc from the top Recorder Tray and temporarily place in the Output Bin. It will then move the second recorded disc from the Output Bin to the Input Bin so that the printed disc can be placed in the Output Bin when finished. This simultaneous printing and recording greatly increases the throughput of your Publisher. In most cases, print time takes no more than 2 minutes. After printing the first disc, the Publishers Printer Disc Tray opens automatically. The Robotic Disc Transporter moves the finished disc to the Output Bin. This includes information on how to load the supplies ink and disc media necessary to start producing discs. Please refer to the following for more information on each step The Installer application should automatically launch in a few moments. If it does, proceed to Step 2. If it does not automatically launch, follow these steps The on screen instructions will guide you stepby step through the installation process. Once you have installed the software, store the original program CDROM in a safe place. You can check with your system administrator or check with Apple support to confirm whether or not your account has administrative rights. Click the Continue button. All components will be installed to their proper locations. Section C below will describe how to connect the Publisher to your Mac. However, different brands of discs have different printable coatings. Refer to Section 3A and 4E for further printer driver information. Click Install Anyway or Install this driver software anyway to continue installing the printer driver for your Publisher. Click Add again. The cartridge labels are color coded to the cartridge covers. SureThing CD Labeler is used to design the printing on your discs.

http://pacatuamigo.com/images/Dimplex-Heater-Owners-Manual.pdf

PTPublisher controls the recording and allows you to select the image to be printed to your discs. Both applications will be described in detail in this section. This project reads the master disc from the Disc Publisher drive to the hard drive of your computer. PTPublisher uses this temporary file to make all subsequent copies that are requested. The master disc is read only once to create the initial temporary file. A Copy Project sub menu will be displayed. Choose Copy CD or Copy DVD. Step one of the Copy Disc wizard will be displayed. The tray door will open automatically. Place the disc in the drive and click OK. Have you lost your user manual. Download the Primera manual in which you will find instructions on how to install, use, maintain and service your product. Find your instruction

Looking for instruction manuals Ask us. It is ideal for printing labels, name badges, wristbands and other types of narrow format output including many waterproof substrates. Fullcolour printing adds significant impact to the printed output and helps reduce errors by eliminating handwriting. With impressive 4800 dpi print resolution, you can print text, graphics, colour alerts and logos along with highresolution linear and 2D bar codes on every label, wristband or ID badge you print.

The printer's small size and compact footprint allows it to be installed in labs, on counters or many battery operated medical carts that have limited space. Can also be used with most other popular label design software programs. Click here to reset your password.Our retail showroom will also remain closed during this time until further notice. We have recently increased the size of our team and are processing orders as quickly and as safely as possible and appreciate your patience during these times. This has resulted in both extended delays on package deliveries, and inaccurate or delayed tracking information once packages are handed onto the courier service. The StarTrack customer service team may not be aware of this issue and may provide inaccurate information. Unfortunately, these issues are out of our control. This service does not relate to Videoguys Australias internal order processing. We can not refund the shipping cost if the delays are caused by StarTrack's service. The PickUp option will remain unavailable until further notice. Due to this inconvenience, Videoguys Australia is providing free shipping to our Metropolitan Melbourne customers. We have recently increased the size of our team to aid the increased amount of enquires accordingly. Please be patient as our team is working through all inquiries as quickly as possible. Inflammatory behaviour towards them is unnecessary and unaccepted. We are restocking as fast as we can. If you need assistance finding an alternative from available inventory, our sales and

customer service teams are available to answer your questions via phone or email. We also appreciate your understanding if it takes a few extra days to process returns. We require this information to capture all your details, so we can provide you with accurate shipping costs, and also if we needed to discuss particulars of the request with you.

You can also add any comments to the request, and select what your preferred method of payment will be. A Confirmation of the request will also be emailed to you. Please allow up to 24hrs for Processing. It includes the recorder, printer, recording software from Sonic, and SureThing label software from MicroVision. No stomping, no punchout labels, no need to flip the disc overjust a clean print on inkjet printable discs. Its the next wave of information and art, technology and aesthetics. With RadialPrint technology we can control the position of the ink cartridge, and while the media spins, we can place ink on any spot on the media with accuracy. This technology simplifies the users experience because the CD or DVD is inserted in only once device for both burning and printing, allowing the user to obtain professional looking results without the hassle of multiple steps and devices. In addition, any business that creates a DVD or CD for promotional use, or as a service to their clientele will appreciate how easily the DUET 400 slips into their current environment. It takes up the space of a phone on your desk and is designed for commercialgrade performance. The DUET 400 does not include expensive robotics. This design is perfect for those who create small batches of unique content. VideoGuys Australia is not responsible for typographical or illustrative errors.Videoguys Australia reserves all rights not expressly granted herein.
