Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. NRevell Top Contributor Architecture 5.0 out of 5 stars Its been getting quirky for some time. Went online and found the instructions and TV codes. Set up is easy, got it programmed in minutes. Great to no longer have quirky buttons. My TV and Dish box are in different rooms, so the IR remote isnt needed. These dont come with batteries, so make sure you have four AAA batteries ready. They were just what I needed. I should have looked on the Dish site first, they are a better deal there. No setup for Dish was required. Worked directly out of the box. What can I say. What can I say Been weeks and still trying to figure out how to program it. They work perfectly and he understands how to use them because they are almost exactly like his originals. Instructions to use inside. Programmed easily. In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. For the latest DISH receivers, call 877.312.4547. DISH 322 features two tuners for independent satellite TV viewing on two separate televisions, all in a slimline chassis design. We have no control over this. Please assume you are getting a refurbished model, though many times the receivers are new. <http://contua.org/userfiles/canon-4025-user-manual.xml>

We're having technical issues, but we'll be back in a flash. Done. The digital receiver provides viewing on two different TVs using the same receiver, and the multiroom device features two compatible remote controls for Standard Definition viewing. Enjoy enhanced features like Caller ID, DVR, and Dolby Digital sound. With display resolution of 480i, programs come in clear and colorful with vibrant images and superior sound. Lightweight and easy to install, the receiver uses RCA outputs to quickly connect to a SD television set. Check the Guide channel to see what programs are coming on so you can set the DVR to record shows you may miss, and enjoy a parental control feature that keeps kids from viewing adult-only programming. Get high performance picture quality and multiple features that make your favorite shows even more fun to watch. If you have service with DishNetwork and are looking for an additional receiver to use on a standard definition tv or a hdtv, but dont subscribe to HD programming. This is an excellent box to own. It has a dual tuner which allows you to watch two different channels at the same time on two different tvs with only this one receiver. You will need two remotes one will be a 3.0IR and the other a 4.0UHF. You need a coax run from the receiver to the second tv, or if you put a splitter on that coax, you can send the signal to two or more locations. Then use the 4.0UHF remote to control channels in which ever room you are watching the second program. You can also program the AUX key to control the second tv or other device. With two individual tuners, the DISH Network 322 allow you to view satellite TV program in two rooms with a single receiver.

The agile modulated mono output in this DISH Network satellite receiver lets you send the tuners signal to various TV through your home. The Electronic Program Guide in this DISH Network receiver lets you view up to two days of program listings or information. The DISH Network 322 is a DISH home interactive TV that let you watch your favorite TV channel and news. The 2nd UHF remote in this DISH Network satellite receiver allows you to change channels from the 2nd television location. The parental control feature in this DISH Network receiver restrict your child from watching something that you dont want them to watch. Product Identifiers. Brand DISH Network. Model 322 Broadcast Type Satellite. Services Compatibility DirecTV. Inputs RF TV x 1, Satellite x 2. Outputs Analog Audio x 2, Composite x 2, RF x 1, SVideo x 1. Features. Included Accessories Remote Control. Additional Features Over the Air Software Download, Parental Lock. Additional Ports Telephone RJ11 x 1. Additional Functionalities Digital TV Receiver. Dimensions. Width 15 in. Depth 10.63 in. Height 1.75 in. Description. With two individual tuners, the DISH Network 322 allow you to view satellite TV program in two rooms with a single receiver. Outputs Analog Audio x 2, Composite x 2, RF x 1, SVideo x 1. Features. Included Accessories Remote Control. Additional Features Over the Air Software Download, Parental Lock. Additional Ports Telephone RJ11 x 1. Additional Functionalities Digital TV Receiver. Dimensions. It is a great receiver because you dont have to pay extra money for a second tv. When I received the new receiver I hooked it up, then when I went to activate it they wouldnt let me because I had an eastern arc dish

with dish network at my house but anyhow I was not going to be using an eastern arc dish in my camper that is the place I hooked it up. So when I called to activate they kept on telling me I could not activate this receiver on an eastern arc account. I kept on telling them I was using a dish 500. After Finally talking and talking on the phone I eventually got it activated. Thank goodness. I would not recommend to anyone with eastern arc account unless your willin to fight with dish, the only reason I was willing to is because I wasnt buying an mpeg 4 receiver for 2 sdtvs. It provided us with two receivers in one housing instead of having two different receivers. Our previous receivers were HD receivers. Verisign. Please call for items availability This remote is designed to operate Dish Network, Echostar and HTS models as well as Phillips and Jvc Infrared receivers 1000, 2000, 2150, 2700, 2800, 3700, 3000, 3500, 3800, 3900, 3000, 3100, 4100, 301, 311, 322 and many more. This is also Universal and will operate up to four devices Satellite Receiver, TV, VCR, Auxillary Device, etc.It will not operate the 2nd room, as that requires a different type of remote. Instead, perform a code scan. Instructions are on the page below.A list of recommended remotes is shown below. This is the cause for many remotes not being able to learn Dish codes. Recommended remotes are below It is similar to All for One remotes and it manufactured by the same company but this version has a backlit keypad.

<http://iprep-u.com/images/Dirt-Devil-Jaguar-Shampooer-Manual.pdf>

If you really want to customize these remotes, build or buy a JP1 cable and download your own files to these remotes. These are very powerful and very easily configured via a PC and the Harmony website. Just input the make and model of your device and the correct codes are automatically identified. The correct inputs are automatically selected on all devices through a setup wizard. A powerful and easy remote. There are discussion forums on everything related to remote controls. A large number of remotes have been released in the past year. Click here for an excellent table comparing the models. If you can't get your Dish remote to control another device, it's probably because the Dish remote is missing the codes. This acrobat file is also available on the Dish Network website. Simply start over again. The light will blink off after each digit is entered and then return to a steady light. If the code entered is valid for the remote, the mode light flashes three times. Simply start over. If the code entered is valid for the remote, the mode light flashes three times. Some codes may provide partial functions or respond differently than the button's titled function. Try the other codes listed for that device until you find one that offers more complete functionality. If several codes power on the device, try all of the buttons for each code to find which one best controls all of the functions of the device. The first digit indicates the device type If the code you entered is valid for your remote, the mode light will blink 3 times. If the code is correct, the device should turn off. Occasionally the Power button may work when other buttons do not. Write all of the codes you programmed on to the sticker that came with your satellite receiver and apply the sticker to the inside of the remote battery cover. If you have tried all of the device codes without success, try using the following Power Scan procedure.

<http://churchoftheresurrectionacc.com/images/Dirt-Devil-Jaguar-Upright-Vacuum-Manual.pdf>

When this happens, try some other functions to make sure you have the correct code. Occasionally the Power button may work when other buttons do not. The mode light will start flashing slowly. The mode light will stop flashing and stay lit. The Down arrow button scans backward and the Up arrow button scans forward. If the code is valid for your remote, the mode light will blink 3 times. Occasionally the Power button may work when others do not. The scan will resume from the last code stored. The remote control may not control some device models. Here are some simple tips before you begin This will give you quicker and more consistent results. Manually turn on the device you are trying to program before you begin the Power Scan. If the scan powers the device off, but does not give full function, restart scan mode and continue for example, there are dozens of RCA TV codes. Not all devices are supported, and many will only give you basic functions. If performing the

Power Scan correctly then it should not take more than six minutes to find the code. Simply start over again. There will be a pause between the flash sequences for the digits. A quick flash indicates zero. Otherwise, you may need to reprogram these codes into the remote. Switching to a different address is necessary if you have 2 satellite receivers or if your neighbor's receiver is set on the same remote address and they are changing your channels. The SAT mode light will stop flashing and stay lit. If you entered a valid remote address, the SAT mode light will blink 3 times. If not, power the satellite receiver off and wait 15 seconds. This will bring up the "Important System Information" menu. The screen will update and the "remote address" listed on the screen will change to the new remote address of the remote control. Specifically there is no address button on the remote for changing the address if you have multiple receivers. The new process is pretty simple, but not intuitive.

I have tried everything you suggest. Is there any way I can control both receivers with the same dish remote. All my electronic equipment is in an "equipment closet" out of site of the tv's and other equipment. Most of my equipment is setup with an IR setup. In my bedroom where I am setting up my second tv I dont have the IR setup capability. Is there any way the remote will be able to control these two receivers seperately without a "line of site" operation. Thanks in advance for your expertise. The remote does not change any channels or control my television anymore. I have changed the batteries 2X and the only time the buttons on top light up is if I take the batteries out and put them back in. Not sure what else to do. Can you help me with this please LG codes aren't listed in the receiver manual nor on the Dish web site. The problem is that when I try to set the receiver to use that code 676, the message "That code is not in the database" is returned. The receiver has the current software version. Is there a way to force an upgrade of the receiver's database, or to program that code into the receiver. Also, would the code databases be the same in both models DP301 and 311. Thanks for the help. But I just got ahold of an older year 2000 AIWA Stereo CD Player, i like it cause it has AUX for my TV. I am surprised my Dish Net remote does not control it, at all, even with Power Scan. I have the Echostar receiver, model 3700, Reg. ID 005. The codes 627 and 659 work with the exception of volume and power. PLS. help if possible. Thanks, Dean This is the cause for many remotes not being able to learn Dish codes. Recommended remotes are below" I'm sure other remotes support this as well; 57 kHz is not that uncommon. The code scan also did not work. According to everything I've read will not duplicate the function of the Dish TV2 remote. I think there is a lot more at work here than just a remote that will output 57Khz or greater. It is not an RF signal.

You're getting the two confused. There is no remote that will control a Dish receiver directly over RF. If you want multiroom control from a universal remote, you'll need to get one that communicates with it's own base station via RF; the remotes base station would control the dish network receiver via IR. These instructions are for adding IR receiving capability to Dish receivers that do not have it. You are absolutely correct, it was my misinterpretation. I was ONLY talking about the RF capability for a TV2 Dish remote which operates a Dish DVR or other UHF capable Dish receiver from another room. This is a direct RF operation, no IR involved although the same remote has IR capability also to operate certain components in the remote location. Not to be confused with RF remotes that transmit signal via RF and then has an RF receiver that converts the signal back to IR to operate components in another room. I used to have a learning remote controlling it, but that was before I got Dish, plus it broke. I will go get another one if need be, but it would be nice if the dish remote could control that too. Thank you very much. My TV has to go into game mode for me to play my XBOX and there is no Game mode on the Dish remote. How do i put it into game mode The guide, info, menu etc. I even tried to change the channel from the box and that did not work either. I put new batteries, just in case,,. no luck Can you help me Can i use a regular universal remote to change the channel on my dish network tv Hope this works for others with the Westinghouse brand. Do you know where I could find a list of codes for something like that I have the Dish network system 625

with 5.0 IR remote. I have tried all the codes in the manual and on their website. Also have tried the scan method with no luck. Do you know of the code to use Thank you. Is their remote with the correct button When you say "Adress" bottom what do you mean.

I did try to do the opposite, program my Dish Remote to control my new Sony LCD HDTV with no results either. Help please Viewing Distance vs. Resolution. Basically i need to know how to program the second remote to control the second tv. The blue indicator light on the front panel will not turn on and nothing works on the control. Red light comes on in the SAT button when pressing remote but no response from receiver.

thanks If you dont have a manual, look on the Dish website for a pdf copy of one. Basically i need to know how to program the second remote to control the second tv. The blue indicator light on the front panel will not turn on and nothing works on the control. Red light comes on in the SAT button when pressing remote but no response from receiver. thanksThen hit RECORD on the remote and the address should change to whatever you selected. Sometimes it takes a couple of times to work. Good luck and welcome aboard! Ed Basically i need to know how to program the second remote to control the second tv. The blue indicator light is not on the front panel will not turn on and nothing works on the control. Red light comes on in the SAT button when pressing remote but no response from receiver. thanks. Also if I change the remote address the only one changes is tv1 address the tv2 will not TV1 works good I also tried the remote with tv1 and it works with it fine.
