

PARTS NOMENCLATURE AND FUNCTIONS

- 1 Power switch POWER**
Press the power switch () to turn on the power supply, and the "LOCK" LED and "33 rpm (0.9%) are displayed on the speed indicator. If the power switch () is pressed when the arm lift is in its lower most position, it will move up.
- 2 Start/Stop button START/STOP**
If the start/stop button is pressed when the turntable is at rest, it will rotate, the arm lift will move down and the "DOWN" LED lights up. Pressing the button while the turntable is rotating causes the arm lift to move up and the "DOWN" LED goes off. The turntable stops when the arm lift reaches its uppermost position.
- 3 Lock indicator LOCK**
The lock indicator will light when the turntable speed reaches the specified phase-lock state. It flickers when the turntable speed is in transition, such as when stopping, starting or changing speeds. It remains off during stop.
- 4 Speed button SPEED 33/45**
When the power switch () goes on, it automatically sets the turntable speed to 33-1/3 rpm. Press the speed button once to change the speed to 45 rpm, and once again to reset it to 33-1/3. Speed selection can be repeated this way.
- 5 Arm Lifter button LIFTER UP/DOWN**
Each time the button is pressed, the arm lifter moves up/down. The lamp will light when the lifter is down.
- 6 Pitch control button PITCH CONTROL**
The turntable speed can be increased or decreased precisely by the quartz-lock system. The speed increases 0.1% every time the "HIGH" button is pressed, and automatically increases 0.4% per second if the button is kept pressed in. The speed can be increased up to a maximum of +9.9%, and it is displayed on the digital speed indicator. The "LOW" button decreases the speed up to (0.9% max.) in a similar way to the "HIGH" button. Pressing the "NORMAL" button resets the speed which was changed by pressing either the "HIGH" or "LOW" button, to the predetermined value (0.0%).
- 7 Anti-skating knob**
When a record is being played, a force which pulls the stylus towards the center of the turntable is generated. This force is compensated for by adjusting the Anti-skating knob.
- 8 Q damping knob Q DAMPING**
The recommended amount of Q damping can be achieved by setting the Q damping knob to the same value as the stylus force.
- 9 Weight ring**
Use this ring to obtain zero balance of the tone-arm.
- 10 Arm rest**
By holding the finger grip of the headshell and moving it to the left, the tonearm lock is disengaged. When locking the tonearm, push it in the opposite direction.
