Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

Dragon Naturally Speaking 10 Manual

Please also see the KnowledgeBase where a wide range of users exchange tips and discuss feature requests. The guide also includes tips and notes to help you use the software more effectively. For the latest technical details, please see the KnowledgeBase. Once the headset is charged and paired to its dongle, you must power it up by holding its button for about 6 seconds it then emits 4 ascending beeps, then pressing it for 1 second to activate its radio link to its dongle It also covers how to check the "recording device" settings in the Windows Control Panel. You can use your voice for complete command and control of your computer. Common commands can be particularly helpful when working with Microsoft Word. This guide summarizes common commands to help you boost your productivity when creating documents in Word. Using these commands, you can avoid the multiple menuselection and mousemovement steps associated with the traditional Microsoft Windows interface. For more videos, visit our Feature Demos page and our YouTube channel. This video includes how to charge and power up the headset, as well as turn on the connection to its USB wireless adapter. It also covers how to check the "recording device" settings in the Windows Control Panel. This video shows how to create a User Profile that best reflects your voice, audio environment, and audio input devices; it also introduces important tools Dragon can use to quickly learn how to best recognize what you dictate. This video includes launching the default email program, checking for new mail, and creating a new message, and uses Microsoft Outlook Express as an example. Simple to create, these commands can quickly add to the benefits of dictating speed, convenience, consistency. Register a free business account Clicking and typing is so mundane. This handy, fully updated guide shows you how to use Dragon to tell your computer what to do. Learn to be even more productive with daily tasks like managing email, updating Facebook, and creating documents. Use this book to discover tips that save time and your sanity, and even explore app development with Dragon. This handy, fully updated guide shows you how to use Dragon to tell your computer what to do. Use this book to discover tips that save time and your sanity, and even explore app development with Dragon. Meet your Dragon find out what version of Dragon NaturallySpeaking you need and what it can and can't do Basic training. Her online marketing company, Digital Media Works, Inc., helps businesses uncover their hidden profits. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Only other reference material is on Computer and difficult to read and practice at same time. With Dragon for Dummies, like myself, it walks you through step by step how to use it correctly. Believe me when I say that without this book, it makes it very difficult to use it the proper way. Dragon is, however, a big and complex program that requires some definite understanding to use successfully. This book is an excellent guide to getting started and then a good clear reference when you find yourself forgetting some detail. I also love the Dragon Naturally speaking program. I bought the book to help me learn how to edit what I have dictated. It is very helpful. Nonetheless, I learned quite a bit and hope that transposing the hot keys to Mac will work efficiently. I have a feeling they will. It cleared up a lot of the mystery. Thank you.

Frank Mileti Even though the software comes with a tutorial this still gives further insight on the product. The book could have been made a little shorter. I would rebuy it. Dragon installed faultlessly on Win 10 I have only done a few hours but the dictation is fine. I'm writing out a cheat sheet to pin up in front of me to remind my ageing brain. Suggest you start with the Home version and upgrade later. The mike that comes with it is fine as a start. Have started my Family History and book on Beekeeping hints both already being drafted. Saves learning to type! I have latest Apple Sierra, Absolutely essential you buy the appropriate version of the software direct from Nuance. It learns your profile as you go, so it attunes to your voice. In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. <http://www.statcardsports.com/node/12152>

ManualSearcher. com If you continue to use this site we will assume that you are happy with it. Read more Ok. If you have user profiles from NaturallySpeaking version 10 or 11, the Upgrade Wizard finds those user profiles and sets them up in version 12. Otherwise you're guided through the creation of a new user profile. Follow these steps The DVD in the white envelope has a label with a serial number on it. The serial number enables you to activate the program, so keep it handy. You'll see duplicates of the number in a peeloff label format for your convenience. For safekeeping, peel two of them off leaving one on the envelope and put them on your software receipt or in a file folder where you'll be able to find them again. Microphones other than those with a USB including the headset microphones that come with NaturallySpeaking editions plug into your computer's sound card. If you have a desktop computer, turn the computer so that you can see the back where all the cables are. Look at the the operating guide. Your computer likely has colorcoded jacks for the microphone and the headset. The headset has two colorcoded plugs that correspond to the ones on the headset. Insert the plugs into the jacks as shown in the photo they supply. The Windows AutoRun feature starts running the installation program automatically. Nothing is wrong. Do this instead Doubleclick the Computer icon on the Windows desktop. When the Computer window opens, find the icon corresponding to your DVDROM drive, and doubleclick it. Find the setup.exe file in the DVDROM window and doubleclick it. Now you are exactly where you would be if it had started automatically. The End User License Agreement appears. You are presented with the customer information window. The serial number will never have any letter O s in it. If you see something that looks like an O, it's always a zero. If you agree, do nothing. If you'd like to choose a different folder, click the Change button.

A Change Current Destination Folder window appears. Select the folder you want. After you select the folder you want, click the OK button in the Choose Directory window. You can click Back to return to the preceding screen and change the choices you made there. This may take several minutes. When all the files are copied, a screen appears, and you're asked to choose a way to register the software. You can choose Register Online, Print Registration Form, or Remind Me in 7 Days. Make your choice based on your needs. Deselect the check box if you don't want to look for updates. A check box that's automatically selected looks for program updates when the setup is complete. You can either activate it now or within five more uses. Activation is required to use the program after the fifth use. This is done to verify that you are using a valid serial number. No personal information is sent. If you don't choose to activate now, you will be prompted the next five times you use the software. If you checked your system requirements before you installed the program, it's unlikely that you will get an alert screen. But if you do, this screen alerts you that you don't have enough computer resources probably RAM to run some of the external programs listed with Natural Language commands and that performance will be slower. If an internet connection is not available on the machine with the software, please do the following Launch the Dragon NaturallySpeaking software. Verify that the Serial Number was entered correctly including entering 0's zeros not O's. Go to the following address Enter in the two pieces of information Serial Number Machine Fingerprint Verify that the information is entered correctly. Click the "Generate Activation Key" button. Copy and paste the produced activation key into the first cell on the Activation dialog. If the number is entered in manually, verify the number in its entirety. Click "OK" to activate the product. Talking to a computer while it types what you say is called dictating. You can dictate, rather than type, into any program that accepts text. You can use Dragon to Compose letters, memos, and send messages Cut and paste inside your documents as well as revise and format text. Just think about what you want to say, and then say it into the microphone. Enter data into forms or spreadsheets. Available in

Professional and higher editions Most people can dictate numbers faster than they can type. Using Dragon Professional or higher editions, you can create custom voice commands to let you move from field to field on your form by voice. Work on the Web Search the Web, access information, and navigate Web pages by speaking URLs and links. Start programs and open menus. Use handheld recorders to dictate while you are away from your computer. Dragon can then transcribe what you said. 1 Most information presented applies to all the editions, and differences between the editions are noted.

Conventions used in this guide 1 This guide contains many examples of words and phrases you can say when using Dragon. These examples appear in italics with quotation marks, for example *Format That Bold*. 2 Some procedures also include sample text for you to dictate. Sample text appears in a different typeface, with punctuation in square brackets. 3 This guide applies to the five English dialects that ship with Dragon US English UK English Australian English Indian English Southeast Asian English US English uses US spelling, punctuation, and time and currency formats. We recommend US English for Canadian users since this dialect formats numbers including times, telephone numbers, and currency in North American formats. All other dialects use UK spelling, punctuation, and time and currency formats some number settings depend on your Windows Regional Settings. Where multiple dialects are used in dictation examples, those dialects appear in a different font style. Tips and notes appear like this NOTE If you pause correctly, but Dragon still types a command as dictation, you can force it to recognize what you say as a command by holding down the CTRL key. With Numbers Mode on, Dragon tries to interpret everything you say as a number. If you dictate words, the results will be unpredictable. However, you can still navigate menus and switch between programs by voice when Numbers Mode is on. What should I expect from Dragon. One reason to use Dragon is to do your writing more quickly; creating letters, reports, and other documents by voice. Another is to reduce the stress associated with keyboarding. Or maybe you just like the idea of being able to lean back in your chair, put your feet up on the desk, and still get work done. Dragon is good for all these reasons, but making it work well requires some effort from you. Dragon learns about your voice and pronunciation as you use it. When you use words the program doesn't know, it will misrecognize them.

By correcting your mistakes, you help Dragon improve its ability to recognize your way of speaking. Do I still need my keyboard and mouse. Although you can use Dragon to do almost everything on your computer by voice, some things are still easier to do using the mouse or keyboard. If using a mouse and keyboard is an option for you, try experimenting with using your voice and using your hands for different tasks, to see what works best. What if I can't use a keyboard and mouse. If using a mouse and keyboard is not an option, Chapter 4, Working on Your Desktop on page 47. 3 System requirements to run Dragon are Intel Pentium 4 or equivalent AMD processor 1GHz processor or greater. Recommended Intel Pentium 2.4 GHz 1.6 GHz dual core processor or equivalent AMD processor. Faster processor will produce faster performance. NOTE During the installation process the software checks to make sure your system meets the minimum requirements. If your system does not meet the requirements, the software will not be installed. 512 MB RAM minimum. Recommended 1 GB RAM. For Windows Vista, 1GB RAM is required. 512 KB minimum L2 Cache. Recommended 1 GB L2 Cache. Minimum of 1 GB of free hard disk space. Minimum 2.5 GB for Dragon Medical. Windows 2000 Service Pack 4 or higher, or Windows Server 2000 Service Pack 4 or higher, Windows Server 2003, Windows XP Home or Windows XP Professional 32bit with Service Pack 2 or higher, and Windows Vista Home or Professional Windows Vista with or without Service Pack 1 32bit only. DVD drive required for installation. Sound card capable of recording, set to 16 bit 11 KHz for audio recording. 5. A microphone is included with the full product, but is not included with upgrade versions. Microsoft Internet Explorer 6 or higher free download available at Speakers Optional for playback of recorded speech and text-to-speech features. For Bluetooth wireless microphone support, visit An Internet connection for activation and automatic updates.

Additional software Citrix MetaFrame Presentation Server 4.0 or 4.5 for Citrix support. Multiple users on one computer Dragon is licensed on a per individual basis. You are permitted to install the software on more than one computer such as on a desktop and a laptop computer, or on a work and a home computer, but you cannot use the software concurrently on more than one computer. You are permitted to create multiple voice profiles, so long as each voice profile is for you. If someone else wants to create a voice profile, that person must purchase a separate Dragon license. Volume license agreements are available. Plugging in the microphone To use Dragon, you will need to plug in your microphone. If you are not sure how to plug in your microphone, consult the documentation that came with your microphone. NOTE If you already have speakers for your computer, you can also use these to playback recorded speech instead of your headphones. 6 Installing on Windows Vista Dragon Version 10 is compatible with all editions of Windows Vista. Versions 8.x, 9.0, and 9.1 of Dragon do not install or run on Windows Vista. Versions 9.5 and higher do work on Windows Vista. If you upgrade a machine from a previous version of Windows to Windows Vista and that machine has Version 8.x, 9.0, or 9.1 of Dragon installed, that version of Dragon will not work after upgrading to Windows Vista. All your user profiles from these previous versions remain intact and can be upgraded when you install Dragon Version 9.5 or higher. Coexistence with other Dragon products Coexistence with previous versions of Dragon You can have only one version of Dragon NaturallySpeaking installed on your system. NOTE Running Version 8.x or 9.x concurrently with Version 10 is not supported.

Coexistence with Dragon NaturallySpeaking SDK Client Edition You can install Dragon SDK Client Edition 10 on the same machine where Dragon 10 is installed. In addition, Dragon 10 and Dragon SDK Client Edition 10 can share users and vocabularies. You can only run one product at a time. For example, if you are running Dragon, you cannot run any of the SDK Client tools or samples. NOTE Coexistence of Version 10 with Dragon SDK Client Edition Version 8.x or 9.x is not supported. 7 NOTE You must have Administrator rights to install or uninstall Dragon on Windows 2000, Windows XP, or Windows Vista. Administrator rights are not required to create a user or use the software after installation. On Windows 2000, Windows XP Professional, and Windows Vista systems, if as an administrator you want to create a Dragon user for a Windows limited user user with restricted privileges, you must log on using that Windows limited user account before creating the Dragon NaturallySpeaking user. If you create a Dragon user account for a limited user while logged in as a Windows administrator, the limited user will not be able to access that user account. These restrictions also apply to an upgrade installation. 3 Choose the type of installation to carry out. Choose Installation Type Choose whether to install the entire product or only particular features of the product, as explained in the next section. You can also carry out an MSI installation. Refer to the online Dragon System Administrator Guide PDF or Help file for details. 8 Nuance recommends you do a complete installation unless you are experienced with the product. The table below tells more about each installation type. Requires the maximum disk space. Lets you select options and speech files to install. Can greatly reduce the disk space required.

During a custom installation, in the Dragon Naturally Speaking Professional and Dragon Medical editions, you can modify settings that are then applied to all users created with this installation, including Windows limited account users. NOTE If you decide not to install some Dragon components by selecting Custom installation, you can install them later by running the Setup program again and choosing Modify. To carry out a custom installation, proceed to Installing software Custom Installation on page 11. Otherwise, proceed with Installing software Typical Installation on page 9. Installing software Typical Installation To install all features of Dragon 1 Insert the Dragon DVD into your DVD drive. If the installation does not start automatically, use Windows Explorer to find and doubleclick setup.exe on the DVD. 9 Read the text and select I accept the terms., then click Next. 4 Enter your User Name and Organization, and the Serial Number

supplied to your installation. 5 Optional When the Setup Type page appears, click the Change button and choose where to install the product. If no earlier versions of Dragon are installed on your system, the default directory is C:\Program Files\Nuance\NaturallySpeaking10 For a list of directories created by installation, see Version 10 File Structure on page While you are still on the Setup Type page, select Typical. 10 The DragonBar appears on your desktop. 11optional If you have users from Version 8.x or 9.x that you would like to upgrade before proceeding, refer to Upgrading Existing Users from Versions 8.x and 9.x on page If you have no previously existing users, the New User Wizard starts immediately after you run the product. Proceed to Creating a new user on page 18 to set up a user, then continue as instructed, to train the user. You are now ready to create a user, as explained under Creating a new user on page 18.

Installing software Custom Installation To install portions of Dragon or to install it for multiple users 1 Insert the Dragon DVD into your DVD drive. If the installation does not start automatically, use Windows Explorer to find and doubleclick setup.exe on the DVD. 11. Read the text and select I accept the terms., then click Next. 4 Enter your User Name and Organization, and the Serial Number supplied to your installation. 5 Optional When the Setup Type page appears, click the Change button and choose where to install the product. If no earlier versions of Dragon are installed on your system, the default directory is C:\Program Files\Nuance\NaturallySpeaking10 For a list of directories created by installation, see Version 10 File Structure on page While you are still on the Setup Type page, select Custom for the type of installation. NOTE If you decide not to install some Dragon components by selecting Custom installation, you can install them later by running the Setup program again and choosing Modify. 12. For example, see the selections for the Southeast Asian English vocabulary shown in the illustration below. If you are using Dragon Medical, you can choose to install, for example, the Surgery vocabulary under US English, shown in the next illustration. 13 The user files for each language or dialect contain both spellings and pronunciations specific to that region. For example, users who wish to dictate US English spellings including users with accents should install the US American English user files. 8 Click Next again and, if you do not have the Professional or Medical edition, skip to the next step. Otherwise, choose any check boxes under Additional options to have additional dialog boxes pop up at the end of the installation, where you can make changes that affect all users dictating on this computer. OPTION 9 Click Next.
