Tuning of this unit to broadcast channels can be performed in two ways. 1 "Easy Setting Menu" or "Advanced Setting Menu" will appear. Auto tuning Programme

the tuner to scan only the channels you can receive in your area. <http://www.pomocstudentom.pl/pub/crm-express-professional-manual.xml>

You can record on DVDR only once. On DVDRW, you can record and erase many times. It is possible to record on DVDR only in Video mode. DVDRW can record in the format you select from Video mode or VR mode. Some satellite broadcasts include copyprotected information. If you wish to record them, refer to the following. You can also manually format a DVDRW disc once it has been used. After formatting, you can record on the disc with the recording format selected in the Setting menu. You can change this to VR mode using the Setting menu. This unit can receive bilingual broadcasts. Each mode is indicated on the TV screen as follows. External input Audio Basic recording DVD Video VR DVDRW DVDRW DVDR Follow the steps below to record a TV programme. Stereo Bilingual 1 Turn on the unit and insert a recordable disc. Make sure that the TV input is set on the unit. E41 Power failure E42 No disc The error programme will be deleted once you check the error in the programme list, or once you cancel the timerstandby mode and reenter it. However, for AV3 jacks, you have to select SVIDEO input or VIDEO input jacks depending on the connected devices. Use commercially available Scart, SVideo or Video cable and an Audio cable for this connection. VCR DVDRW DVDRW DVDR You can copy a DVD disc to a videotape or copy a videotape to a DVD disc. This function will be available only if the DVD disc or the tape is not copy protected. See pages 22 and 63. You cannot cancel finalising a DVDR disc once it has started. 5 Finalising is complete. Information on playing back DVDs Colour systems Read the following information before you play back a DVD. DVDs are recorded using different colour systems throughout the world. The most common colour system, used primarily in the U.K. and other EU countries, is PAL. This unit uses the PAL system. Playback will start. Unrecognisable characters are replaced with asterisks. Refer to the information accompanying the disc for details.

Repeat this step until all the features you want are set up or to start playing back the disc from the menu. The following operations are available. VCD This unit conforms to ver.1.1 and ver.2.0 of the Video CD standard playback control PBC function. This enables you to play back interactive software using menu screens. Forward Approx. Speed x1.5 x20 x40 Reverse Approx. The unit moves to the next track one after the other. Repeat playback DVDV MP3 VCD PBC OFF CD 1 DVDR VCD "Easy Setting Menu" or "Advanced Setting Menu" will appear. You can select the format of audio and video to suit the content of the disc you are playing back. This function reduces noise in the playback picture. When playing back discs recorded in long time modes such as 8H or 10H, select "Type 1" or "Type 2." "Type 2" is more effective. When playing back discs with a little noise, such as DVDVideos, select "OFF. It is not possible to edit discs recorded using the NTSC system. To enter the title name, refer to "Guide to editing title names" on this page. Writing on the disc starts. It may take a while to write the data on a disc. Insert a recordable disc before editing. Even when a title is deleted from the playlist, the original title will remain. The available recording time on the disc will not increase. Insert a recordable disc before editing. VR DVDRW You can edit the title names from this menu. The names you edit will appear on the title list. VR DVDRW You can set a picture as a thumbnail for each title. This helps you to remember the content of the title without having to play it back. The first picture of the title is selected as the default. Playlist Playlist Adding titles to a Playlist 1 2 3 VR DVDRW You can add a title to the playlist as you wish. Use the table as a reference for efficient operation. Setting menu Language setting page 58 Display setting page 59 Audio Setting pages 5960 Parental setting page 61 Menu items Default Disc Menu Language English Sets the disc menu language.

<http://ninethreefox.com/?q=node/17488>

Audio Language Original Sets the audio language. This will only affect DVDs playback. Your setting is activated. DVDVideos Parental lock level Some DVDVideos feature a Parental Lock function. If the rating of the inserted disc exceeds the level you set, playback will stop. To record on it later, cover

the hole with cellophane tape. This unit will receive stereo and bilingual broadcasts and it is possible to record in several ways and to play back the sound. Press it again and the unit will search in super high speed. Some simple checks or a minor adjustment by you may eliminate the problem and restore correct operation. There is no picture. Refer to "AUTO HEAD CLEANING". Region Error — Please eject the disc. — Playback is not authorized in your region. In contrast, digital audio can also be an electrical signal, but is an indirect representation of sound. See also Digital audio. Aspect ratio The width of a TV screen relative to its height. Conventional TVs are 4:3 i.e., the screen is almost square. To purchase DRV B2737 spares or accessories, please contact the company via their website or visit an authorised retailer. Translate this page Relevant VIDEODVD forum topics Funai DDVR4800 combo, Error2 code mit jelent megoldva udv dvd resz kifogastalan.

Video resz par percig megy, majd ERR2 koddal kikapcsol, 4 oras kazettat odavissza rendesen teker, mechanika, fekek rendben latszodnak Neten es tanyai SMben nem talaltam utalast, kezelesit sem. Tehat mit jelent az ERR2. Balint Megis fekhiba volt, a hatso fek filce kemeny volt. Kis masszirozás, feldorzsolás használt neki 10 éve vettem újonnan, raktárból, olcsón, azóta fent volt a szekrény tetején, dobozban Funai VCR8007 Sziasztok! Ezzel a videoval az a baj, hogy lejátszás közben a kép oldalra szaladgal és nem áll be a kép. Előtte ekszijákat kellett cserélni benne és most ezzel nem boldogulok, fej megtisztítva, a saját felvétele is szalad. Mi lehet ilyenkor a gond tap hiba, vagy valami más gond. FUNAI 31D250 kiadaskor nem húzza vissza a szalagot Kész Sziasztok! Ezzel a videoval az a gondom hogy nem húzza vissza a szalagot, amikor kiadja a kazettát. A kuplungnal nyújtottam a rugón de semmi változás, és meg kipucoltam a mód kapcsolót is. Lejátszás közben is gyengén viszi a szalagot, de meg jó, gyors tekerésnél jó. Mit nem vettem észre. Egy ideje kuzdok már ezzel a gépezettel. Jelenleg rendben üzemel a masina egészen a videomagnó indításáig. Nem megáll vagy ilyesmi hanem olyan mint mikor a kikapcsoló gombot nyomnam meg. Tehat leallitja a sormeghajtást, mechanikat alaphelyzete teszi és készenletre áll. Bekapcsolva kiadja a kazettát és működik tovább. Amennyiben nem indítom a videót akkor nem kapcsol le. Tapfeszültségek rendben és az üzem mód kapcsoló is. Kinomban már capstain motort is cseréltem. Amúgy több kísérletet követően már video üzemből sem kapcsol le, minden funkciót hibátlanul csinál. Melegedésre gyanakodnak, de otletem sincs merre keressélek. Gondoltam talán valaki ismeri ezt a jelenséget és megosztja a megoldást. Köszönettel Kiss Z. Mint azt ketten is jelezték, Hjóco és SzBalint, a hiba az infra led gyengesége okozta a orsók közli kerekenél. Köszönöm nektek a gyors segítséget.

Similar manuals You can write in English language into the forum not only in Hungarian. This unit will search for the time only when the power is off. Leave the unit off for several minutes to give it time to set the clock. Something went wrong. I searched this one out as it got some great reviews. It was easy to use and converted beautifully. There are tapes it will not copy to DVD despite not being copy protected. I know they are not because I recorded them myself. But this machine insists it can not write them. Also the error messages are not clear. It took me some time to work out that it was the machines saying the tape was copy protected when it said the DVD could not be written. Went through quite a few blanks before I figured that out. Well designed and excellent quality. Picture

quality is excellent. The Hard drive is very handy to have. Overall i think that this is an excellent product. 2 0 by ingridthompson 19 Jan, 2008 Using the DVDS I brought this to transfer video to DVD I found that even using the recommended DVDS It was a hit or miss affair whether it would accept the disc and record on it.It's spam or has links There are copyright or trademark issues It's offensive or has swear words It includes Feedback about the seller Something else Cancel Send We received your report. Just for the record it has one laser unit inside which fires off two frequencies one for read the other for write.

The manufacturer sets these lasers at safe usable limits but after some use they start malfunctioning. I wanted to copy a VHS recorded disc to my PC tonight only to find I hadn't finalised it in my Funai. Realising I couldn't because of the silly E4 54037380 error I finally took the plunge and dismantled the unit. NOTE the following is not for the faint hearted and please use an antistatic wrist strap to earth yourself. The Disc tray mechanism has to be removed and a small circuit board directly to the right has too be released. There are a plethora of ribbon cables but only one needs disconnection. Carefully turn the disc drive mechanism on its back and unclip the thick ribbon cable that attaches to the laser. Tuck the cable out of the way being careful not to damage it. Move the lens unit to the top of the tray mechanism and note there are two potentiometers Using a pot tool or fine flat bladed screwdriver adjust the lower pot by an eighth of a turn this increases the frequency of the recording laser enough to eliminate the E4 54037380 error completely or it did in my case.Problem solved fully working recorder. Dismantling procedure Disconnect Funai from mains and remove the top casing 5 screws There are 4 screws holding disc drive mechanism in front right most tricky use grabber tool to retrieve screw Top right has an earth cable connected to it The other end of the earth cable is held in by another screw on theThe board is held on by two small plastic lugs which need compressing so the board can pop up. Remove drive mechanism carefully along with the circuit board and flipLogin to post Is it possible to be supplied one.How can I troubleshoot this It turns on for 1 second and then turns off. Red standby light blinks on and off, what can I do Answer questions, earn points and help others. For a better experience, please enable JavaScript in your browser before proceeding. It may not display this or other websites correctly.

You should upgrade or use an alternative browser. Some TVs have a shared component composite input. If these are regular VHS releases they will have copy guard on them. You will have a problem copying them onto a stand alone DVD recorder. In this case I would just replace the tapes with DVDs used ones would be cheap or BD discs. You could transfer them into a computer and then burn discs. There is software that will bypass the copy guard. You will need a video card with composite input. Is there any hope We are working every day to make sure our community is one of the best.
