Since the company's genesis, the experts at DSC have been leading the way. From our revolutionary control panels, to our industry leading IP alarm monitoring products and now to our sleek, contemporary self contained wireless panels, DSC has always been front and center in the security space. ISO 9001 Registered. To determine which model you have installed, check your main control panel which is typically located in a basement or closet area or match your keypad to one below. Download How to Test Your Alarm System to learn more. If you do not have Acrobat, please download your free copy of Adobe Acrobat NOW. All information was provided from our web site as promotional purposes only. Web Design by Kyle Skitromo Back to Top. The wide input voltage range of 7 to 34VDC is compatible with industry standard 12V, 24V, and 28V inputs. Onboard intelligence provides an unsurpassed level of control, monitoring and safety. All features are accessible and configurable via benchtop application software plus a programming library for realtime control. The JupiterMM5000 uses a stateofheart design with the latest generation highefficiency components. It delivers efficiency as high as 95 per cent, reducing input power requirements as well as heat generation. JupiterMM5000 was engineered for rugged applications such as automotive or onvehicle. Lowprofile, surface mount components reduce susceptibility to shock and vibration. Both a low profile heat sink and heat spreader cooling options are available. ADVANCED SYSTEM CONTROLLER The fullfeatured JupiterMM5312 models include a system controller that offers advanced configuration, control, and monitoring features. The system controller is accessed via a USB port and is accompanied by benchtop configuration software as well as an application library for inapplication realtime control. <http://archerelectricsupply.com/userfiles/cuisinart-blender-repair-manual.xml>

The main power input is on a 4position terminal block featuring dual input conductors for increased current capacity. Cooling Options Diamond Systems recommends that JMM5000 power supplies with heat sinks be used only in applications with power dissipation of 100W or less. The heat spreader cooling thermal option can be used for all output loads.
