If I have helped you with your request would you please rate this response accordingly. thank you The tires could be worn or glazed with rosin. Try cleaning the tires with mineral spirits to remove the buildup. The other possibility is that the pulleys are out of alignment. To check this, put a straight edge across the face of the lower pulley and see if squares with the upper pulley, if it doesn't, loosen the set screw on the upper pulley and adjust accordingly Either cast out of true or deflect under pressure. Login to post I suggest you to read the blogs on bandsawblog.com. They have blogs about band saw blade tensioning, tracking and tuning up band saw. It's probably the same with older craftsman 3 wheeled bandsaws, do some cross referencing <http://www.connecttravelservices.com/uploads/userfiles/debonair-220-manual-unlock.xml>

- **duracraft bandsaw 20314 manual, duracraft bandsaw 20314 manual pdf, duracraft bandsaw 20314 manual download, duracraft bandsaw 20314 manual instructions, duracraft bandsaw 20314 manual parts.**

Or just call the manufacturer directly. Urethane or rubber Make sure the adjustment are correct or probably you need to replace the tires. I am using ultra blue urethane tires because it lasts longer and it doesn't need gluing. Urethanes are more durable than rubber. I got mine on. Tire comes off bottom wheel sometimes. Don't know how to set up this saw. If desperate could glue on with weather strip adhesive. put bandsaw blade on both tires spin wheels with power off till blade is running in center of wheel by adjusting top wheel in or out. When done adjust blade guides to blade and bearings to back of blade. This is top and bottom of cutting area. If general settings problem, please follow this advice Brand of bandsaw is of no importance, problem is. I assume that problem is with Please follow these instructions, I love bandsaws, they are one of best and most universal woodworking machines, used as well in food and metal industries. Now, Start with tension, open covers, retract top above Do remember, that these operations must If you have problem with your bandsaw, not related to adjustments, please do not hesitate to ask further You did not stated what is exactly the problem, I assume therefore the problem is with regulation of the blade motion. Please follow these instructions, I posted them previously for another member, they apply to any bandsaw in existence, regardless of brand, manufacture, age or look. I love bandsaws, they are one of best and most universal woodworking machines, used as well in food and metal industries. Now, Start with tension, open covers, retract top above Do remember, that these operations must If you still

have some trouble with your bandsaw, please do not hesitate to ask further questions, let us know how you get along with this info. I have done exactly what the manual says to do. I am not sure the square box on the outside is fitting. The little arm. How do you adjust it.<http://dycelife.com/userfiles/debonair-250-installation-manual.xml>

As you turn both at the same time the blade will track either the front or back of the wheel. Move the knob while spinning the wheel until the blade is tracking in the middle of the tire. rubber strip around the wheel Have you ever heard of this type of problem Answer questions, earn points and help others. You can look at this manual online. Good luck Login to post Its probably the same with older craftsman 3 wheeled bandsaws, do some cross referencing. You may also search on power.manualsonline website If you need a blade, I recommend you to visit sawblade.com, they custom made blades, I ordered my blades from them. Whats your band saw blade. I am using Haltbar blades and never got problems tensioning. Have you ever heard of this type of problem Answer questions, earn points and help others. Please choose a different delivery location.
