So whether you are looking for wireless fire alarm systems, wired fire alarms, a sealed lead acid battery or fire extinguishers, you are sure to find the perfect fire safety product for your needs with us here at The Safety Centre. Diane delivers key information on how to lift properly AND how to prevent long and short term injuries happening to you and your staff. Allowed 5 people to be trained with minimal disruption to working day Will certainly be looking at purchasing more training videos, particularly the one on manual handling of patients which would be ideal for our nurses. By showing them this DVD and then discussing the details of what had been learnt, we were able to ensure that all staff involved in carrying or lifting, understood how it should be done correctly. Will be very useful for our in house manual handling training program. It was useful to be able to use the DVD in conjunction with booklets so that participants had something to refer to afterwards and were able to complete a questionnaire to ensure they had understood the training. We would rate the DVD as 5 out of 5.

The contents were insightful, clear, interesting and made some very good points about the process of handling. Ideal for training, presented in a realistic and interesting way. It was very clear and precise, and a gladiator doing backflips across the screen really made them all sit up immediately. So in all, a well thought out DVD which I would recommend. I used this DVD to start the training session followed by my own bespoke powerpoint presentation. It served well to reinforce the major factors and key points that need to be expressed during training and found it very useful as a reference tool during my presentation. Would definitely recommend this DVD. It provides a clear and

concise discussion of why we need to be aware of manual handling techniques and how to avoid the injuries associated with lifting loads. It will complement our in house training and brings many of the points home visually. I used this to supplement a Manual Handling training course. The commentary is interesting and covers all the basic points needed I believe at 30 minutes, it maintains the audience interest, while still conveying the importance of manual handling training. Our staff find the dvd most informative and we have drawn up a small question and answer session to ensure it is fully understood. The dvd has helped us ensure that all staff are trained at the same level and that we have consistency in training. It shows the basics in lifting and the injuries that can be caused due to bad lifting Looks very good and practical at about the right length to keep operatives attention. Will be using throughout the company.

It will certainly help us in making our staff more aware of manual handling requirements, Peter Moore The quality and level is very good The information contained was well presented, and provided our employees with the necessary understanding of the need for correct lifting technique and the potential for injury if those techniques are not employed It covered a mundane subject in an interesting way. Staff remember the dvd and put the manual handling techniques in to practice regularly. It can be used with both new and experienced staff either as an introduction or a refresher. Information in the DVD was presented very clearly and it was easy to select just the sections that were relevant to the natures of the business. Would recommend this to other businesses where manual handling is a minor part of work activities. Easy to understand and not too long to lose the audience. Would recommend to anyone who requires manual handling training. Recommended. I would recommend the manual handling DVD for viewing and its also excellent value. Highly recommended and good value for money. This Manual Handling DVD covers the subject well and in a different way which helps to get and keep peoples attention. Our high quality and innovative training, education and eLearning interventions are aimed at building the competence and confidence of health service managers and staff. Informa PLCs registered office is 5 Howick Place, London SW1P 1WG. Registered in England and Wales. Number 8860726. January 13, 2010. Videos encourage a multisensory learning experience because they can involve text, moving images, and sound. Using multiple senses to understand a concept allows users to make more cognitive connections. It encourages them to understand the concepts better and think deeply. What are the Benefits of Video Training The overall opinion was that as the Bespoke DVD covered specific tasks within our own production facility, and featured our people doing the tasks, it was therefore more relevant by association. I think the DVD will become a very useful training tool for its intended induction purpose and also as a refresher tool. It will certainly be of great benefit to us moving forward by not only providing great advice to staff, but also giving us the flexibility to deliver the training whenever it is needed Their final films are always very clear and professionally put together. Using a voiceover and smart graphics shows Ostepathic Solutions go the extra mile too ensure their DVDs are of the highest quality and remain engaging for viewers throughout. Included in my work history is 6 years of elevator installation, during which time I am guilty of all the incorrect techniques Gareth and his team are teaching to avoid. This has left me with lower back problems and pain which I will probably suffer from for the rest of my life. I have learned a lot

working with Gareth and I only wish I knew him sooner . It encourages them to understand the concepts better and think deeply. Their final films are always very clear and professionally put together.

Using a voiceover and smart graphics shows Osteopathic Solutions go the extra mile too ensure their DVDs are of the highest quality and remain engaging for viewers throughout. I have been working with the team since starting voice over and learned so much in the process. Gareth and the team put so much important information into each project. The quality of each presentation shows how important it is for these guys that you get the best information. If you value your spine, or your ability to walk pain free, I advise hitting the team up! It gives lots of practical examples of both bad and good manual handling techniques. It is very informative and easy to understand. A very useful tool in our manual handling training tool box. Included in my work history is 6 years of elevator installation, during which time I am guilty of all the incorrect techniques Gareth and his team are teaching to avoid. Looks at manual handling. Targeting attitudes at the root of bad practice and combining key principles through an interactive approach through hands on activities. For those who require a course covering the basics or a refresher course, our condensed Introduction to Manual Handling course is ideal. For customers who would like something more specific, we provide bespoke packages, with tailored content, photography and branding. Why not leave a review Leave feedback. But in today's workplaces, lifting and carrying related injuries still represent the largest problem in Health and Safety. It's only as we get older and become lazy that we begin to adopt unnatural and potentially injurious lifting and carrying techniques.

The program is a fun, fresh and entertaining way to explore the fundamentals of correct lifting and carrying as practiced by the experts Children. If you have an idea of costs and where to obtain it, it would be very much appreciated. There is a manual handling DVD called watch your back, I cant say that it is particularly interesting but are any of them, however if gives a good understanding of Manual Handling and covers everything that is needed. It also gives four different sectors, warehousing, factory, office and outside workers. I think you can get if from safety media who will do try before you buy so you can suss it out first. Its about 150 inc VAT. Child play, i think it is called, only 6 minutes long but shows small children lifting correctly.

It only when we develop that we lift in correctly apparantly CHilds play is excellent, or try Get back active which is more about Rehab we used both Back to back excuse the pun ! I also think it was the cheepest option as well you can also upgrade and use the work book as well which give a cert for the personnel files. Should always try a facility like this prior to purchase to make sure it gives out the right information, it is what you want, and it has the right approach. Teaching babies to suck eggs I guess, but better s. Hi, I use the Manual Handling for Industry New Approach by Vocam www.vocam.com. I have used this film for the last 10 months or so during training and find it to be very staright forward. Mind you it wasnt very cheap but I feel was worth the money. Stevie We use a DVD that is produced by ROSPA and FPA. It concentrates on handling techniques and does not dwell on any industry in particular. Its good value as well, as it costs around 99. Have a look at the Fire Protection Association website. Many thanks, for your excellent feedback I will try a couple to check they are appropriate before I buy! Shows how children naturally lift correctly and makes the point that as we grow older we develop bad habits. About 250 from Safety Care 020 8547 3500 . Brando

David. Did you come to a conclusion as to best option. I need to find similar for office based staff. Regards, Peter. Gin wheels, mobile cranes and accessories for dangerous areas faced on site. The inclusion or omission of brickguards should be considered when discussing the contract. As employers you must carry out an assessment and identify any control measures which should be implemented. Remember you are assessing the activity being carried out using the substance and not just the substance alone! For a better experience, we recommend using another browser.
