Dott 2.0 out of 5 stars I dont recommend this camera at all. He has used it many times this year, mostly on fishing trips, and we are very impressed with the camera. For the price, it cant be beat. My son wanted it primarily as a movie camera, but I was most impressed with the stills. It is a very simple camera, and therefore very easy to use. For those who claim that it is only a 5X optical zoom, please look at your camera with you eyes open. The 5 is the number of megapixels, not the zoom power. That is 20X. If you are a professional, this camera is obviously not for you, but for the rest of us the other 99.9%, this is a terrific inexpensive camera. I even purchased one and returned it almost immediately because it turned out to be junk. Then I saw this DXG camera on Amazon.com. The sale price was unbelievable, so I decided to purchase it. I am an amateur photographer at best, but after following the easy directions, I was taking beautiful HD videos from the very beginning. I was amazed when I watched these videos on my HD television. I cant wait to capture my upcoming Florida vacation with this great camera. Bob The focus isnt the best and the camera doesnt handle low light well either. In HD mode, the video undulates and moves in all directions when viewing. It can make one seasick.

I sent an email asking about this problem and have never received a response. If you are looking for a normal video camera, its not bad. The single shot isnt bad either if outdoors and have enough light. The monitor screen is very difficult to see outdoors so you may wind up guessing at where to aim for the shot. Ive lost a video sequence because I couldnt tell if the unit was recording because I couldnt see the details on the screen. I hit the record button but. Once you use a memory card it cant be reused with this device. Even if you erase the memory. Memory wasnt too good. HD was great. I have introduced this product to so many people, because I have used it and I can see how nice its. In some of the advertisements for DXG you might even notice a California location. Contributing to any country of origin confusion is DXGs executive board. Most people who would communicate with DXGUSA would do so through the sales, marketing or customer service departments. There you will find persons of responsibility with the names of Goldberg, delRosario and Castillo, respectively, which lends to an American image. Digging slightly deeper youll find that those company executives with positions of major authority have Asian names. Some Japanese and Chinese companies have been known to send their own executives to the U.S. in order to run the company as if it were in their home country. Others may use U.S. addresses while company executives remain overseas. Its unknown if DXG is participating in either of these practices. Unfortunately, however, a WalMart order for this camera took several weeks to leave the warehouse and was eventually lost in shipment. Video and sound was very fluid while recording stationary objects as well as moving in a vehicle. The integrated manual lens cover is a nice idea and circumvents the old problem of a lens cap dangling during the action. All controls are easily accessible.

The originally supplied camera possessed a defect which would report a charged battery as depleted and shut down the camera. Batteries are important because it is not possible to use an AC wall adapter to supply power to this camera. Total Media Extreme is comprised of about five main features. DXGs version of the software package consists of only two. Thats about as detailed as DXGUSA gets in their own description of the 595Vs features. Some of the documentation is also misleading such as references to the cameras microphone which are listed in two different places on the camera in two different guides or the wrong item circled in an illustration. Directions for updating the cameras firmware are no different. Some selfhelp pages lead to blank pages while others have only three suggestions none of which even pertained to the 595V. Although this response was sent from the email address of Carlos Castillo, Director of Customer Relations for DXG, the senders name was posted as Chad Meza. The message was also stamped at five hours time difference from US Eastern Time. A trace of the IP address the message was sent from, 207.210.80.162, reveals that the server being used was located in Atlanta, Georgia, but the DXGUSA message appears to have originated from Jalandhar, PU India. It is suggested that you make your purchase through Amazon since their return policy is painless and their prices are usually the lowest available. The reliability of the product, however, is unknown and should it fail, even under the warranty period, there is little or no support for the product. Twelve of these complaints pertained to DXG agreeing to comply with their contract. The BBB does, however, give DXG a very good rating. You could be submitting a large.
