To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Easy machine to use and I always like the result. It will still emboss, but it dents the whole ribbon terribly and stamps each letter upon the last. It worked for literally five minutes before it gave up the ghost. I've tried to coax it back to life, but my efforts have been fruitless. I should have taken the reviews more seriously. Je les ai tous identifie sans probleme. Jappuie une bonne force pour chaque lettre et le resultat est parfait. Je recommande fortement ce produit I realise it was because the bottom wheel the one that has separation in it was offbeat resulting in having the cutting part not aligned with the actual cutting symbol. It moves pretty easily so be careful. For the price, Im really happy and I think it is worth it. I really love it and Im glad its not broken after all. Its plastic with plastic internals which easily fail so its not worth buying they should go back to the old metal ones as this one is junk dont waste your money. Please try again. Please try again. Please try again later. Please try again later. Mandy 2.0 out of 5 stars But then it broke, 6 days after I got it in the mail. Now the tape seems to jam a little, and the letters don't print even when the tape isn't jammed. I'm so disappointed. I gave it 4 stars instead of 5 because you occasionally need to open it up. The trimmed bits at the ends can get stuck in the mechanism. To fix you simply need to remove the screws and shake it out. Both had degraded function after the first roll of tape no longer cutting cleanly and letters not punching clearly and were essentially junk by the time the second roll of tape was finished. Dont know the solution. Things are just made poorly nowadays. Try eBay for something made 30 years ago. For the first 5 or 6 days it worked beautifully. The tape was sticky enough to stick to anything I put it on including cloth covered folders and it just had that vibe I was going for. Then suddenly it just stopped working. The tape became misaligned and the maker stopped functioning. It wouldnt make any indents in the tape nor would it cut it. Dont bother wasting your time or money. Invest in something better constructed than a few bits of cheap plastic. I had been looking for one of these for a long time. I

purchased this even though there were quite a few bad reviews. Shipping was great and fast. The product seemed a little cheap, but it seemed to work ok at first. I only used it 3 times to make labels with less than 8 characters each. The next label i tried to make jammed. It doesnt work anymore. I dont know if its defective or just junk, but either way.its a waste of money.<http://dreamfuturegroup.com/userfiles/devilbiss-sleepcube-user-manual.xml>

No batteries needed, just a firm grip on the trigger. The only complaint I would have is that no instructions for use or reloading the plastic tape are included; but Ive used these before so that wasnt a problem for me, and I imagine instructions are available online and on YouTube videos its pretty simple. Great product and not expensive.I was very pleased with the lettering and adhesion of the stickers, but after a month of very minor use I was using it for two labels a day at most, it jammed. I pulled the spool out from the feeding end and reloaded it, but the letters I tried to use while it was jammed no longer worked, and while testing it afterwards the remaining letters soon failed as well. I now have four spools of useless labels, and a broken label maker.Just took it out of storage to make a few more labels, and it doesnt work. UPDATE I was about to throw it away, but decided to try it one more time for whatever reason. It didnt work just left little dents instead of legible letters, so I went through all the punches from A to Z and pressed really hard. On one of the letters, I heard a loud snap and thought that I broke something, but it started working again. Maybe something was loose inside and not aligning properly. I dont know. I still ended up ordering an old vintage one made of metal online though. Would still recommend buying one of those before this plastic thing. I'm obsessed with my new embossing label maker. It makes the perfect, cute little labels for anything you need. So far, I've made labels for our dish and hand soap for our kitchen.

I learned pretty quickly that the trick with it is to press the trigger hard and hold it down for about 2 seconds and you will get perfectly clear and crisp letters. See more VS Most helpful negative review Average Rating 2.0 out of 5 stars Worked okay at first This label maker worked okay at first. Then, little pieces of tape were getting stuck inside and interfered with the embossing. Also, the letters were spaced too far apart compared with my old model. Decided to buy the Pro model to replace this. Spend a couple more dollars and get the Pro model. It works much better. Something went wrong.On eBay, youll discover a fantastic range of new and used label makers at great prices, so spending a little while browsing the listings and photos could be very rewarding. Whatever your needs, therell be a label maker for the job. Simple paper labels are good for general use, but those with a metallic finish can look really attractive; theyre a good option if you want to label gifts or other special items. Food labels may need to be safe for freezer, dishwasher, or microwave use, so check the model youre considering can support these. You can also get ironon labels for things like name tapes on childrens clothes. Things to look for include Most use between four and six AA or AAA cells, so check eBay listings to see whether theyre included. Label printers that are easily rechargeable may be worth considering if youre likely to be a heavy user.

Another option is an AC interface, which will let you forget about batteries altogether. If you use a batterypowered label printer, look at listings to see where theyre placed, as this will affect the weight and handling of the device. If you need to mark a larger item, such as a folder, look through eBays listings for a model that can take 18 mm label tape or larger. Coloured tapes tend to stand out, so you may want to go slightly slimmer than with white label tape. Pro for your in the market, then by our will definitely fit your. We'd love to help you out. Orders requiring credit information might take additional time. This product arrives to most customers in 23 business days. I followed guides and watched YouTube videos to make sure I was doing it right. Now I lost a roll of tape and my labeler doesn't work anymore. I put it away for a while and tried pulling it out with a new roll of tape. Yeah, another roll of tape. Wasted! Would not recommend this product. Before it stopped working I really enjoyed the quality of the labels but the actual label maker. Not great quality. It's a huge hit in the workplace. We've literally been labeling EVERYTHING Count me as one satisfied customer!. One quibble The letterspacing between embossures seems overly generous, and I'd like to know whether its adjustable maybe by some internal setting of the tape feed mechanism in the way of saving tape and improving readability. I'm quite capable of disassembling and reassembling the device if necessary to make such an alteration, but I'd like to know in advance what to expect. Hey, somebody needed to step in and offset the two downright dismal reviews from the manually challenged that have stained this item's Webpage so far.. Best regards Don't waste your money. Your friend will receive an email from you with a link to our site. Be the first to ask here. Please enter your name, email, and phone number below. We will contact you as soon as this product is available. Softgrip handle for comfort, convenience and performance. Ideal for labeling duties in kitchens or offices. Enhanced tape cutting feature makes the labels easy to load, cut, and remove. No batteries required.
