Thanks to the advertising, dark theme and more Premium Bro, I work in JB 6.2.A.1.100. And hopefully it works with Google account because ZU, which is tested, does not work with Google account entry. I heard that the Walkman Xperia Z program was also updated. 7.9.A.0.1 ... This ZU 7.6.A.0.1 ... Is there any difference? If you have shifted brother: Angel: reactions: Tlastprnsm, WÄ¶lveâ®ne, Deepakverma and 3 other brothers are working in my jb 6.2.a.1.100. And hopefully it works with Google account because ZU, which is tested, does not work with Google account entry. I heard that the Walkman Xperia Z program was also updated. 7.9.A.0.1 ... This ZU 7.6.A.0.1 ... Is there any difference? If so, you'll shift brother: Melek: Walkman Xperia Z has been updated and of course there are differences, but I don't know how to move. This application cannot be installed on phones with version 4.1.2, the minimum requirement is 4.2.2. Thank you brother, my brother does not work left 4.1.2 project XV -r MT27I device was sent to get my album / Case using Tapatalk 2 FC, I apologize for my bad English reactions: Wildybhai has a good foundation (program information). Where did you get BG from somewhere? Try to open the theme. When I tried your album, Drayaable -hdpi APK and review sent through my ST27i device via XDA Premium. We are talking about version 5.1.1.a.0.6. XPERIA U.100 DEODEKSED is not working on my Xperia U.100 device sent from my ST25i device via Developers 2 Page 2? Xperia Go JB does not work on my Stock Rom device. Redabali flashing cwm. The author's function did not work immediately after the flashing. Now the album works well. Thank you. Sony Xperia P - Dark Rom V2.5 - Sliding XP v9. @Ben Ling PM Sent from my ST27I via XDA Premium THX, it works well with my salt. Do you have a Walkman application?! It was sent by MT27I via XDA Premium, XU ICs .100 Thanks. Last Issue: 2013 2 August: Xperince Bootloader: I worked to replace my album with a new one because the locked errors have not yet been corrected. So he doesn't work at all? Can you install it as a normal apk file? Is Flash or flash or the application album appears in the application drawer? Page 3Ads, remove Dark and more with Bro Premium. It works on my JB 6.2.a.100. And I hope it works with google account so well because the tests were done so that even they don't work with saved google account. I also hear Walkman app updated by Xperia Z. 7.9.a.0.1 ... Zu -ONE is 7.6.A.0.1 ... Differences? In that case could you take it bro? : Angelo: Reactions: Tlastprism, Woelveâ®NE, Deepankarvers and 3 more bro, this is my JB 6.2.a.100. And I hope it works with google account as well because the tests were done so that even they don't work with saved google account. I also hear Walkman app updated by Xperia Z. 7.9.a.0.1 ... Zu -ONE is 7.6.A.0.1 ... Differences? In that case could you take it bro? : Angel: Yes, the Walkman Xperia Z is updated and obviously makes a difference, but I don't know how to bring it up. This app cannot be installed on phones 4.1.2. Minimum requirement is 4.2.2 Reactions: Yuribear, Asheve666, HBK10 and others @Ben Ling work on my device: Laugh :: laugh: XGO works XGO JB .100 I like it: thanks bro it doesn't work , doesn't work doesn't work Only in 4.1.2 project XV -r, my MT27I with Tapalk 2 FC to apologize for my album/face who apologizes for my bad reactions in English: Wildybhai. You have a nice background in the setting app (setting - app ) XDA Developer App. Redidibl flashing via CWM. The automatic operation function did not work immediately after flashing. Now the album works fine. Thanks Sony Xperia P - Dark ROM V2.5 - SIEB XP V9. @ Ben Ling PM Sent from my ST27i with XDA Premui M thanks, works well My only one. Do you have the Walkman Z app? !! Posted by Mon MT27i with XDA Premium. Thanks pandemic sorry for Thar. Posted by my mt27i using XDA Premium Xu ICs A100 thanks. Last mod: Xperience kernel bootloader: I would like to replace my album -with the new one because the bugs haven't been fixed yet. So does it work at all? Can you install it as a regular APK? Does your component or album show album customization in the app drawer? Page 3 @melrah try to remove semcalbum.apk then run and place itSystem/application with correct permission, then reboot. Check if it works. :OK: Re: Vongola1997 @melrah does it work now? Re: PowerGB XGO MELRAH FC: NE: Sent from my ST27I device via XDA Premium. On the left I am using JB 4.1.2 A.0.400 Bootloader: Can I update it ?? What risk? How can I repair or restore my existing application if SMT is formed? 4 Help with dots: Win: And sorry 4 bad English, thanks. 4 Your tint: Win: then flash my Lefta JB 4.1.2 A.0.400 Bootloader: Unlocked result: I can't use this Auto FC app.. I can't use it. I am using M JB .100 not working now.... only 0.100 ICS Xperia U sent from my Google Nexus 7 device and running with ICS actions sent using correct use of Xperia actions (sometimes but starting the app with Globe )) Edit: Aug 07, 2013 Thanks for the replies, the album works fine in Xgo and Sola, I downloaded the Zip Pandem update for Walkman & Movies and works fine... Thank you for your efforts: OK: OK: OK. : Good job to work with Google account .. Thank you. I received work, but you can try the DDCCABUSLAY Walkman hotspot, it should work for movies, but it doesn't work, but it's moved. Don't advise my wow @ben ling walkman and direct people to another forum, this is a 2012 device forum, not the 2011 forum, then we're back to prehistoric pages! ::: [Pandemi...: JB Moonbreakers® 4 No!!. Last change: August 22, 2013 Page 4 CWM does not open after Flash. I don't know why...the second flash succeeded after I restored it from backup. But when I click "Faces" I see album "SXP, Enigma 5, Nemesis 5.3. Last Edit: Aug 30, 2013. Wondering about working, thanks brother Last Modition: Aug 30, 2013 @Dmitry Buddnikov Semcalbum.apk in your system/application SemCalbum.apk and try to move this Semcalbum.apk to your system/application with proper permission.Then reboot.:OK: @ben ling xperia sola(ics) I am using. But when I turn on the app, it shuts down automatically. I tried cleaning data from settings but nothing changed. On the screenshots it works on your Xperia Sola, right? What can I do? ?Edit: 5.1.A.0.4 Tried it with ZIP but nothing changed, same problem Last edited: Sep 01, 2013 @ben ling 5.1a I keep the album on my Xperia Sola device (ICS I tried cleaning data from settings but nothing changed.In the screenshots it works on your Xperia Sola, n we? What can I do? Edit: I also tried SZip, but nothing has changed, the same problem. He works great on my Sola ICS 0.54, but now he is dead ...: Cris: Sent from my ST25A using XDA Premium .. Thank you, thanks ... Semcalbum.apk to your system/application with the right solution. Then restart. Could you be more specific and determine "this"? FC continues (after firmware zip and willy). Can I delete semcalbum.apk, but what kind of apk should I transfer? I try install album 5.1.a.0.8.zip on Xperia S. Last modifications: September 4, 2013 could you clarify and determine "this"? FC continues (after firmware zip and willy). Can I delete semcalbum.apk, but what kind of apk should I transfer? I try to install album 5.1.a.0.8.zip on Xperia S. Just some extra effort after Flash, I don't know why... the second flash succeeded after I restored... line on the edge of each picture .. !! Do I have a moonwalker v3 Rom ... Did anyone meet? This is fine? Last modifications: September 4, 2013 Thank you, everything works well. Does it work for Slimfxp cm9 from Elia? I sew on CWM. The album/parties do not work on my SXP (Enigma 5.5 - Nemesis 5.4) - the program is stopped. Cleaning and Kesha did not help. ! With the album/face do not work on Xperia GO 6.2.A.1.100! Big! THANK YOU! Review Xperia Go 6.2. Thank you, friend! Sent from my ST25i using XDA App-Developers: Ben Ling, thanks, Bratan works like the magic of my Xperia SP great work. Sent from my LT22i using XDA App-Developers, thanks, bro. It loads really faster than the old one. : HighFive: It works well in LWW and faster than in the previous version, when the application is opened and the card switching: good. faster and more smoother than previous versions. Brands also work, support good warehouse BRO Ben Ling, +1: OK: OK: Well, I do not know why, but the new album APK was forced to close JB 6.2.A.1.100 Sola: I Sent from my MT27i using the mobile application XDA Premium 4 @itachilinux, delete common sources or install the 1st album. Then restart. Then insert this album into the system/application restart. Do Try this method, I tried to remove the warehouse album and Flash CWM, but the album is still FC when choosing faces. Ideas? The cache is already cleaned by Kesh Dalvik. Hi, I recently installed two new applications, one of which is the album on this topic and the other is Walkman from XZ.And now the display options are Mobile Bravia Engine 2 and Mobile Bravia Engine - can it be caused by album installation? Anyone else? I have not installed another, warehouse JB 4.1.2, XP. And I have a random FC, always clicking on my face and sometimes leaving the album with the return button. Can I do something to fix it? FACS FC XPU also JBV6. Sent from my St25i using XDA AM App Developers, to JB. Moonwalker v5.5 Rom .. Sent from my LT22I using XDA Premium. Reaction: Xperia2013 Page 7 Face Works Great! V. 5.2.0.6: No - Works great in the Xperia GO 62.A.1.100! The album 5.2.A.0.6 works great with the Xperia Go 6.2.A.1.100 Stock ROM thanks! Album FCé when I saw the gif file:/ I just worked on JB .100, but it doesn't work in a flasher, I press manually thank you for your work album 5.2.A.0.6 is nice, but I can't enter the version key, there is no change. You can help me ?? Hi John HK! 1. Tap the photo. 2. Then tap again. 3. You will see "Press to define the location" and 3 icons. The second is the editing of the button. Reaction: John Page 8 I'll try it in my Xperia Ray ICS events. And it acts as magic ^^! Thank you again for your work. Gif has no functions ... Back to version 5.1.0.9 Braz! Thanks for the fashion, just for the info, had to manually pressed on the apk, installing through CWM failed, plus work very well, no Google connection and sync with Google albums, but I think should be like like how is like How is how like how as like how as like how how as like how now as like how How like how to how, how is the way as like as as as as far as As As As As Aster As As As Aster Application. Ultimate ROM V11 / Munjeni Core Answer: Faooveira Update version 5.2.A.1.20 offers new intuitive ways to arrange and view high quality photos and videos in a dazzling speed. The album also provides immediate photo viewing and sharing in playmorters and other online services, as well as a great use of the Xperia ™ smartphone. Function: Download link to album 5.2.1.20 Reaction: Estape11, Dulesak, Faolivera and 6 others act very well in my Nexus 4, thank you! But it still does not support the correct display of Photosphres;/ Does the latest album run on Xperias 2011? I launch ZIP using recovery in my Xperia T, but it said after the first system interface of the interface and later the album stopped. If I turned off the phone and started at once, no mistake, but when you run the album, it does not mean that you should not appear in the images. But now I waitedAnd they seem! I wrote this answer because I wanted to request an old original album. Apk Xperia T, but it seems to work if there was resolution. .... Change: Didn't work even after stopping! Then this may not work with every ROM. But Xperia is likely to get an official work. 4.4. It works very well with Xperia U controlling the unofficial version of Devwuft 6.2.a.1.100 Stock-JB V6 Lite. After the latest version of Flickker I had a FC problem using CWM, manually adding the system\app and determining the correct authorization (RW-R-). Second edited: November 22, 2013, @bens Liss @Davidmkit 'flooded the fix of account manager and unlimited amount of running music as well as in-memory memory on the album itself.The latest version of my Xperia Sola Ics blocked baggage was sent using XDA Premium by my Walkman, Running Moonwalker V5.5 and Nemes Cronel V6.3? Page 10 guys try apk dup and let me know. FC Sola does not work Android 4.1 5.2.A.1.26 Same problem. The album has disappeared. :/ Please resolve it as soon as possible brother. : Good: album 5.2.a.1.26 Xperia Z Android 4.3 PlayMemorys no longer?! Sony ??? Thanks good xu ics no problem. Thanks: ok: it works well with LWS ics icould contain the cache function of the album? Please? Page 11, Stock Rom 4.1.2 successfully installed on JB XP. Install it or you can simply skip the system/program. Now who can update to Walkman Pak running on JB stock for xp. Sorry for my bad English sent by my LT22i. Last modification: 2013. December 31 xu because it saw my Xperia L big! Rianima the perfect Xperia U with album 5.3.A.0.22 ST25I_6.2.A.100_unoffic_v16. Thanks again. Last modification: January 2, 2014 My Xperia U .54 does not work / minor bug during the sliding of the background in the album program. The new album suits me. Thank you so much for sending cm11 Xperia U from my Xperia U using the XDA Premium 4 mobile app. Sent from my ST25i using XDA Application Developers: OK: it works well with version 5.4 ..a.a.12 of LWS. Roll my xperia! THANK YOU! Page 12 friends please let me know if the latest version works ... the album stopped. The action perfectly installed as usual can open Xperia P (JB Stock .100). THANK YOU. Edit: Anew I just found an omission. When I tried to share a photo from Google+, the sharing window appeared and suddenly disappeared. That's why I couldn't share so many tests. Change the latter to modify it: 13 February 2014. @ben Ling See the post above. Thanks for the album 5.4.A.0.12 FC My Neo L, I used album 5.3.A.0.22, it works well. Thanks: ok: @ben Ling thanks ... the updated program worksTo xu jb .... [q] Where can I find an application of the Update Center, as in a screenshot? .. someone help ... ?? Hellkitkat, did anyone try it on Hellkitkat? Remove what you do not need in the system/application. I have already deleted all other extensions. I can't find the .APK file to delete the Xperia Flickr expansion. Try to find in the settings/loaded and remote applications/plugins or search for data/applications. Thank you for your help. Cannot be found. I have no extensions. This is there when I flash this album application. So the extension could not be found in the folder you described. Can someone tell me how to remove? See this topic: also delete Socialenginecore.apk or 1.apk or Boot Deanstaion from the Play Store and try. But I have Xperia S, not Z. I read the branch that you referred to above. I have already deleted all the applications related to Sony. I do this when I install the standard firmware. Sony's applications I delete Titanium Bekap and Ruth Explorer. And I already doing this at the same time, I'm not a noob. But thanks for the help. I am grateful for. Last editing: February 25, 2014 @ben Ling Hello, I do not want to reproduce memories of my XU JB. I manually press the last album.apk. Bratan @ben Ling does not work in CM11, can you wear it ....? As well as cybercrime .... p.14. It works very well. The album is excellent. It works fine, but it fines again when I click the launch button after every ROM. But Xperia is likely to get an official work. 4.4, but what about KitKat? This worked on Omrom 4.4, but what about blink using CWM! Will it work on Omromm 4.4, but what about KitKat? This worked on Xperia T with XperMimement 3.5. Yes, it will worked because it works great on Nexus 7 Android 4.4 KitKat KRT16, I just took it out, but it crashed: "Album has stopped".....Like my install of Xperiment 3.5, it had the same thing, I have it, I leave and now let it go I'm starting to see that it's not allowed... Change: Even after turning it off! Edited the second one: On November 22, 2013, I just released it, but it crashed: "Album Has Stopped" ..... How is my Xperiment 3.5 installation, it contained the same thing, I opened it and started Now to see if there was resolution. ..... Change: Didn't work even after stopping! Then this may not work with every ROM. But Xperia is likely to get an official work. 4.4. It works very well with Xperia U controlling the unofficial version of Devwuft 6.2.a.1.100 Stock-JB V6 Lite. After the latest version of Flickker I had a FC problem using CWM, manually adding the system\app and determining the correct authorization (RW-R-). 5.2.a.1.26 Xperia Z Android 4.3 PlayMemorys no longer?! Sony ??? Thanks good xu ics no problem. Thanks: ok: it works well with LWS ics icould contain the cache function of the album? Please? Page 11, Stock Rom 4.1.2 successfully installed on JB XP. Install it or you can simply skip the system/program. Now who can update to Walkman Pak

Perfect for Xperia Ray ICS 4.0.4. : Well: @Ben Ling a little off topic, is there a way to perform the latest films for ICS devices? Thank you, Xu works very well! Install manually in system applications! Inviato Dal Mio ST25i Con Tapatalk 4 FC 04-26 15: 49: 51579 E/AndroidFntime (18056): Java.lang.runtimeexception: Supplier com.sonyericsson.album.dashboard.provider.dashboardProvider: Java.dashboardProvider: Java.lang.classnotfeeder. : com.sonyericsson.album.dashboard.provider.dashboardProvider sent since my ST27i with XDA Premium React: Forcing the stop in the Rom Jackperiap Terminator v3.5 !!! Ideas?? Page 16 I'm wrong album FC I use CM11. Xperia P next to the bad FC album. Works perfectly ! Album> The parameter is empty ... ! Why? ! Walkman, video and album all treps except faces which did not work for me on the album 6.0.A.026. Can anyone confirm that it really works? Things that I tried: copied from one application to another and tried to copy the Lib files again and force System/Lib with the authorizations of Flash CWM and send the APK to Non -system cover and Dalvik. There is a faces option in the sidebar. But when I click on it, no face is detected - he is looking for faces in the photos but it does not work. He seems to flash when he duplicates the lyrics and the album icon for a second 5 seconds apart. I can manually change the photo label and the photo appears in the faces section, but it is not scanned although it works properly in the APK of the previous album. Everything else works very well, but I can't find a solution for that. I also tried to uninstall Somcphotoanalysis. Nada, nothing ... Does anyone really have their own album for faces? The album works. It scrolled down FC. Works after erased the data and the cacheSecond time Sholling - FC My ROM - JB 4.1.2 Xu Fixed: /System /App TO TO TO TO TAIN: May 6, 2014 Probado !!!! Beautiful Aporte Gracias!!! :Good :Liauqb: Tested with ICS on Xperia Neo V. The backlight does not work with an illuminated receiver. @Ben Ling Thanks for the new version! But it doesn't work for salt. I tried clearing data and caches. It opens, shows thumbnails, and then closes automatically. XDA Premium from my XPERIA SOLA 4 Page 17 Released using @Ben Ling mobile app Thanks for the update! But it doesn't work for salt. I tried clearing data and caches. It opens, shows thumbnails, and then closes automatically. Released using XDA Premium 4 mobile app from my XPERIA SOLA, so it looks like Sony has made it more compatible with ICS... I'll check the APK soon... Posted from Sony Xperia™ using XperiaOverlay About the ROM?!? I This is KitKat 4.4.2 based on AOSP. This album also doesn't work with CM11 Build 319, have you installed the old version before? If so, uninstall it, open root explorer, go to date/date and remove the com.sonyericsson folder and then try to install the APK manually. Released from Sony Xperia™ using XDA premium reactions: Pepioff, have you installed an old version before? If so, uninstall it, open root explorer go to date/date and remove the com.sonyericsson folder and then try to install the APK manually. Sent from Sony Xperia™ from XDA Premium Yes, I have installed an old version of the album app. I tried to import a new album to System/Apps folder with appropriate permissions. It works, gives miniatures and then FC. But I will try to follow your tips. After all, it doesn't matter if you have the latest versions. New look and something new except the left panel and a larger file size in the system ---------- Post 15:22 ---------- Previous post added 03:15: 00- ---------- Have you installed an old version before? If so, uninstall it, open root explorer, go to date/date and remove the com.sonyericsson folder and then try to install the APK manually. Sent from Sony Xperia™ from XDA Premium YES, this method helps me when I select the image to display the last change, except FC: 22 May 2014 Set 6.0.A.0.26 as an update on Redmi ( 4.2. 2) and it works great . Thank you. The only fault is some artifacts on the screen so that they can be shared after clicking the photo. But this also happened by my 2013023 in previous version where Tapatalk didn't work on Xperia CM11. ANDAlbum album/data/program, but then it doesn't work (FC provides) System/Appliance to force and set permission, but then FC FC. Also, trying to think through Zip using CWM (CM11) and finally doesn't work :) System/Application v3 Xperia 4.1 keyboard and please use the free XDA mobile app with LT22I. If you know any devs you need to meet, let me know and try LT22i'den sent via the free XDA mobile app? About this album app, no ROM, and I did not remove videos in Xperia P CM11. Music and album cannot be loaded. I don't know why the last version you can install left with CM12.1, 7.0.A.0.24. It just wasn't possible. The last album does not work. How can I install it by restoring the reserve? In which version Rooded Xperia P Stock ROM JB 4.1.2 works? Tell us what are the versions of Xperia P, Stock ROM JB 4.1.2? Thanks, why can everyone tell me that I got "Unrequ lotised" after a few seconds of "downloading"? The latest music app is the same. Moto G XT1033 is currently working in version 6.0.1 AOSP. All steps cause FC from the album. Please suggest !!! Like 5 deliveries above .... 1 APK download (here). Create a folder for download @Neo for android.wonderhowto.com/how-to/install-sonsys-s-album-apps-face- Android-0162070/Become Two Links to Two Links are restrictions on Z restrictions on restrictions. Number of installments. Thanks to the last modification: 2015 02 August looks like I can do it on OnePlus 2, did you overlook something? It does not work on One Plus X Bro, it works on my Jb 6.2.A.100. I hope that it also works with a Google account because it tries to act if the Google account is logged in. I heard that the Walkman application was also updated at Xperia Z. 7.9.A.0.1 ... to 7.6.A.0.1 ... any differences? Then you could take it, brother? : Angel: The latest version does not work on my plus x, it is always called an album but an album I am asking for a solution! Can anyone create a universal APK file for those who are not singers/Xperia users. Use another X, but there is an error that you can't install the program. I updated the music to the latest version, because someone in this thread Musik-Opk created a universal APK file for people who are not singers. You should install 7.0.A.0.24, works for most brands (I also use Samsung Galaxy Edge+). The latest ones are beta and work only with the Xperia family. Try and let me know. Hello, Lord, I already use version 7.2 in my mobile phone, but I was looking for a job on version 7.3, but I display a mistake that you can't install the application. Are you missing SD folders because I don't see photos on the SD card?? problem only occurs in the folder view. Installation of the application failed to my other two with hydrogen. Anyone knows why? I can't install albums like an ordinary application. I am trying to solve Apktool Advanced by BDFreak, but there is an error. Thank you in advance. New one. I can install CM13 on a device other than Sony? PD: Music installed with permissions I LIB in the System/APP Folder-16:45 ---- How can I install CM13 on a device other than children? PD: Music installed with permissions I LIB in the System/APP Folder-16:45 ---- How can I install CM13 on a device other than Sony? EngiadoHave you tried installing Mi Z1 via Tapatalk as a regular APK? I'm trying to install like a regular app and put in system/app. This does not work. It is not installed on the Samsung S7, who will advise what? I wouldn't give much for this app, the best gallery I've ever used on a phone. I miss her! Last modified: March 10, 2016 I'm waiting for Universal Apk album if anyone can share here. This won't work on my CM13 which is not expired unless you get the LIB from the APK N itself which links with system apps. The latest work for Nexus 5X is album 7.0.A.0.24 After this version, I have problems installing. Thanks for the update... Page 24 Cyanogen Mod 12 can be installed Hello, I tried different versions and enter RW --------------------- the folder. (Or maybe more) you will find. Copy all files. Return to /6/System/PIV-App/Anbum and create a folder called Lib with RWX R-X R-X resolution and another folder called "Arm" with the same resolution. 7 Copy all the previously unpacked LIBs into this "arm" fordo. 8 Return. Well, it works. Another suggestion ?? However, you cannot install the album. Until now, I Tried: 1) RW-R-R-R-R-R-R-REVED WAS SENT To the all manual files were lost. Cheers thanks, now everything works after installing great music by the method indicated, that's allExcept for downloading music information. Another suggestion ?? However, you cannot install the album. So far, testing has been made: 1) RW-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R / Surroundings using the original file and after signing at Zippeinger. Moto G XT1033 is currently working in version 6.0.1 AOSP. All steps cause FC from the album. Please suggest !!! The music was downloaded from a certain method, everything works except on music information. Another suggestion ?? However, you cannot install the album. So far, testing has been made: 1) RW-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R /Surroundings using the original file and after signing at Zippeninger. Moto G XT1033 is currently working in version 6.0.1 AOSP. The second images are blurred with an increase ... Any help is welcome, thanks! Author: yureka rooting and completing CM 11 @ben Ling I don't know why, but I can't install the last stable or beta version as a regular APK on CM11 XU, as well as manually install it as a system application, this is CF. . Subtract on v. 7.0.a.0.24 Is it possible to create a beta-album and a film in JB 4.1.2? @ Ben Lin, I don't know why, but I knowCM11 Xu'nas as a regular APK, set latest version or breakthrough beta, also manually system app, FC... V. Roll back to 7.0.a.0.24 Same problem... When I 'm trying to figure out this latest 7.0.A.0.26 framework or latest rates I can install for Jelly Bean 4.3, following message in start bar for a few seconds I'm buying: I don't know why X didn't not been installed for Last modified: March 26, 2015 after trying to install the latest APK in my Huawei Y530 (Android 4.3) attachment. Message I get the previous version ending: 1 NIS 2015 fine Hello! I can't install it on CM12. Only other versions (including staff, release, etc.) with flashes of lightning. Is it possible to make a target zip version of the latest beta? :-$, download app with libraries? I think the new version is only for Sony devices. I get the following error during installation: 04-08 13:48:34.330 C/PackageManager (987): com.android.server.pamanagerException: com.sonicsson.album requires generic library com.sony.device ; without success ! with logcat. Me too CM11 Albumv.7.1.x.x ROM cannot load the same as you. The APK can be loaded but cannot be installed. I'm also using a 4.1 private ROM but I can't install it, I would like you to port the latest versions of Xperia 4.1 keyboard and please use the free XDA mobile app with LT22I. If you know any devs you need to meet, let me know and try LT22i'den sent via the free XDA mobile app? About this album app, no ROM, and I did not remove videos in Xperia P CM11. Music and album cannot be loaded. I don't know why the last version you can install left with CM12.1, 7.0.A.0.24. It just wasn't possible. The last album does not work. How can I install it by restoring the reserve? In which version Rooded Xperia P Stock ROM JB 4.1.2 works? Tell us what are the versions of Xperia P, Stock ROM JB 4.1.2? Thanks, why can everyone tell me that I got "Unreq lotised" after a few seconds of "downloading"? The latest music app is the same. Moto G XT1033 is currently working in version 6.0.1 AOSP. However, some older versions of albums and music applications using this link: android.wonderhowto.com/how-to/install-sonsys-s-album-apps-face- Android-0162070/Become Two Links to Two Links are restrictions on Z restrictions on restrictions. Number of installments. Thanks to the last modification: 2015 02 August looks like I can do it on OnePlus 2, did you overlook something? It does not work on One Plus X Bro, it works on my Jb 6.2.A.100. I hope that it also works with a Google account because it tries to act if the Google account is logged in. I heard that the Walkman application was also updated at Xperia Z. 7.9.A.0.1 ... to 7.6.A.0.1 ... any differences? Then you could take it, brother? : Angel: The latest version does not work on my plus x, it is always called an album but an album I am asking for a solution! Can anyone create a universal APK file for those who are not singers/Xperia users. Use another X, but there is an error that you can't install the program. I updated the music to the latest version, because someone in this thread Musik-Opk created a universal APK file for people who are not singers. You should install 7.0.A.0.24, works for most brands (I also use Samsung Galaxy Edge+). The latest ones are beta and work only with the Xperia family. Try and let me know. Hello, Lord, I already use version 7.2 in my mobile phone, but I was looking for a job on version 7.3, but I display a mistake that you can't install the application. Are you missing SD folders because I don't see photos on the SD card?? problem only occurs in the folder view. Installation of the application failed to my other two with hydrogen. Anyone knows why? I can't install albums like an ordinary application. I am trying to solve Apktool Advanced by BDFreak, but there is an error. Thank you in advance. New one. I can install CM13 on a device other than Sony? PD: Music installed with permissions I LIB in the System/APP Folder-16:45 ---- How can I install CM13 on a device other than children? PD: Music installed with permissions I LIB in the System/APP Folder-16:45 ---- How can I install CM13 on a device other than Sony? EngiadoHave you tried installing Mi Z1 via Tapatalk as a regular APK? I'm trying to install like a regular app and put in system/app. This does not work. It is not installed on the Samsung S7, who will advise what? I wouldn't give much for this app, the best gallery I've ever used on a phone. I miss her! Last modified: March 10, 2016 I'm waiting for Universal Apk album if anyone can share here. This won't work on my CM13 which is not expired unless you get the LIB from the APK N itself which links with system apps. The latest work for Nexus 5X is album 7.0.A.0.24 After this version, I have problems installing. Thanks for the update... Page 24 Cyanogen Mod 12 can be installed Hello, I tried different versions and enter RW ------------------- the folder. (Or maybe more) you will find. Copy all files. Return to /6/System/PIV-App/Anbum and create a folder called Lib with RWX R-X R-X resolution and another folder called "Arm" with the same resolution. 7 Copy all the previously unpacked LIBs into this "arm" fordo. 8 Return. Well, it works. Another suggestion ?? However, you cannot install the album. Until now, I Tried: 1) RW-R-R-R-R-R-R-REVED WAS SENT To the all manual files were lost. Cheers thanks, now everything works after installing great music by the method indicated, that's allExcept for downloading music information. Another suggestion ?? However, you cannot install the album. So far, testing has been made: 1) RW-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R / Surroundings using the original file and after signing at Zippeinger. Moto G XT1033 is currently working in version 6.0.1 AOSP. All steps cause FC from the album. Please suggest !!! The music was downloaded from a certain method, everything works except on music information. Another suggestion ?? However, you cannot install the album. So, far, testing has been made: 1) RW-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R-R /Surroundings using the original file and after signing at Zippeninger. Moto G XT1033 is currently working in version 6.0.1 AOSP. App/Anbum and create a folder called Lib with RWX R-X R-X resolution and another folder called "Arm" with the same resolution. 7 Copy all the previously unpacked LIBs into this "arm" fordo. 8 Return. Well, it works. Another suggestion ?? However, you cannot install the album. Until now, I Tried: 1) RW-R-R-R-R-R-R-REVED WAS SENT to System/Media/Application 4) Help the Source FileAnd even after logging in to Zipsigner. Currently 6.0.1 AOSP Moto G XT1033. All events cause the album FC. Please offer !!! You should try the system / person / albums, thank you. It works perfectly in my Onemon 5 cm13-Dgadelha Rom [Emotional4], sent from my Asus_t00f via Tapatalk .1 Download APK (here) .2 Download from Brows album "or" album "or" of what. Folders) In the Lib folder you will find another folder (or possibly more). Copy all files . If he should work if he explained. (Better?) Here with photos (#465). Do not install a component of the Privitive Folder (read only) pages 25. Hi. You managed to work because it was also difficult for me with LG G5.atuch -------------- The record added 07:02 -------------- The previous record was 07: 01 --------- The music is installed in a specified way, everything works except downloading music information. Have an idea ?? However, the album cannot be installed. To date: 1) nooted in the system / gadget using the ROOT explorer with RW-RR --- permissions 2) rooted in the system / program / album using ROOT Explorer with RW-R-R 3) installed in the system / media using Root Explorer with RW-R enabling, which I tried before using the original file, which is expected to be signed with Zipsigner. Currently 6.0.1 AOSP Moto G XT1033. All events cause the album FC. Please offer !!! Hi, when I succeeded, because it was also difficult for me with LG G5. Thank you, it was difficult for me with the LG G5. I when I succeeded, because it was also difficult for me with LG G5. Thank you. Can recorded 07:02 -------------- The previous message was 07:01 ---------- Hello Do this because I have a problem with the LG G5. Thank you. This is the Sony Cross thread, so I don't know why other devices come here and try to install Sony Things LG / Samsung, etc. and start complaining if it doesn't work, it's mainly Sony and no other brand! Buy Xperia later and you will all have this great gadget ^^ versturd vanaf mijn d6603 year wallpaper Hi, can anyone canThe latest version of the jump to sharpen individual recovery. Thank you. Can I upload them to my Moto X game? page 26 I would like you to see the developer issue for an update 7.7.A.0.8 and make the latest album 7.8. It says application not installed album 7.8. It says application not installed & even though we tried to install a music application other than Google Music, the music worked remarkably well. One way to get it to work like all I need is the favorites options as I have a good and up to date app and the Sony album has the right settings and shows on the right and 'working favourites'. There is no folder on the tab. I couldn't install the app for Walkman application) in addition to moments (all photos list). However, I was able to upload the movie application. My phone is not rooted and running on COS 13.1. I get an "application not installed" error. What can be the problem because old versions of these applications are installed? They cannot be installed on a 6.0 Marshmallow system, they cannot be installed on a 6.0 Marshmallow system. This must be done from an unrecognized Android system version number during installation. I don't see any problem with the old version of Sony Album working on my recently upgraded phone. However, when I try to delete the old version and get this new Sony album, I can't install it without any trouble. Sony is working on the devices. Since he doesn't work on the phone, Yu has a Yureka Plus and is running CyanogenMod 12.1. But the old version. What shall I do. Please help reactions: dinesh6252 7.0.a.0.24 I could not install the application. Every initiative and every update since then adds to the add-on all the time. I have 5.0.2. I typed in 7.0.A.0.24 and tried to install 7.8.a.0.8 but stayed in the original form. Any help with an update would be appreciated. Thank you. Edit: I bought a job for 7.2.a.0.6 then got nothing. Latest Release: July 26, 2016 The last and only new album working on SGS7 is 7.2.a.0.6. Places are not working. NT runs on Marshmallow ... and I love the Sony App. Download PlayMemories content online. Other functions have ended. - Device List UI Design Google Master- Error correction and performance improvements. The latest version of Android 4.2 Jelly Bean and Over Album 7.9.A.0.4 (Mediafire) Reaction: CCCS1 and HCP006SL HCP006SLSLSLSL.
