Drive more calmly with Radarbot. Safer. better. CAMERA WARNINGS Enjoy driving without worrying about your safety or your driver's license. Avoid fines and penalties by getting clear warnings before passing speed cameras: - Stationary speed cameras. - Possible mobile speed cameras (private areas). - Speed cameras in tunnels. - Average speed cameras (app shows average speed). - traffic light. cameras.Plus: - Dangerous driving areas.-Seat belts or mobile phones use cameras.-Restricted area access cameras.-Strikes and speed bumps.\* FEATURES:-Works in any country.-Compatibility with other applications. You can use Radarbot with other GPS devices or your favorite music app. You will still receive notifications in the background or when the screen is off. - Warns only in the direction you are driving. The app automatically ignores speed cameras for oncoming or off-route traffic. - Voice alerts. - Audible warnings when approaching a speed camera or exceeding the speed limit. - Vibration mode for drivers. - Fully customizable distances and alert settings. - Automatic connection and launch of Bluetooth. - Compatible with Apple Watch. REAL TIME ALERTS Real-time alerts alert you to any unforeseen circumstances. Radarbot has a community of over 50 million drivers around the world that can be shared and alerted. Instantly know what's happening on the road and avoid traffic jams, dangers, accidents, mobile speedPolice, helicopters, drones and more. SPEED CAM UPDATE Adarbot has the most powerful and up-to-date database of speed cameras in the world. Our team of experts makes daily updates to ensure the database is always up to date. No speed camera escapes the prying eyes of Radarbot! RADARBOT WORLDWIDE Try our completely FREE version for as long as you want. If you want the full experience, you can try "Radarbot GOLD" and "Radarbot GOLD RoadPro" with built-in GPS navigation, exclusive benefits and of course ad-free GPS NAVIGATION AND SPEED LIMITS Discover the power of Radarbot. The GOLD edition offers everything you need on the road in one app: GPS navigation, speed cameras and speed limits. Even if you don't have an internet connection, you will reach your destination safely. Get speed camera alerts wherever you are without worrying about your mobile data usage. Where do you want to go? \* FEATURES: - Offline navigation and 3D maps. - Ability to choose a route with fewer speed cameras. - Speed limits on the road. - Alerts for school zones and associated speed cameras. - Co-pilot of the Radarbot. Fasten your seat belt! ARE YOU A PROFESSIONAL DRIVER? "Radarbot GOLD RoadPro" contains everything a professional driver needs: - Routes with special restrictions for trucks and commercial vehicles. - Speed limits and special speed cameras for trucks. - Individual distance warnings for heavy vehicles. If you have any problems or questions, please feel free to contact us via email Radarbot@iteration-mobile.com or through the in-app customer service. Download Radarbot now and join the Happy Driving campaign! \* Continued use of GPS running in the background can significantly reduce battery life. June 2, 2022 Version 8.7.1 This new version of Radarbot fixes several bugs to improve the app experience. Thank you for using Radarbot.management! There was a brief pause while we were all locked up. However, after reinstalling, how did I dare to remove it from the iPhone, but no information and I think here we are a signal to reinstall. Memory should be a cheap upgradeable part of anything that needs space. SSD fast cheap powerful and small but growing in space? Several updates have been made and it seems to be working better than ever. The interface is nice, easy to see and determine base speed, no red symbols lol. Keep up the good work, the more ground it covers the better it helps us humans with a harmless signal of what's to come. 050000 Hello! I am writing to you from customer service. I have sent a note regarding your comments. I know there is no such thing as a perfect app, but we still want to be close to you! Good day 0 Radarbot is a must have app if you are about to lose or have already lost your driver's license and have opted for the "12 Month Good Driving Guarantee". After 12 months of constant warnings, cautions and reminders, my attention to driving and awareness of speed zones had completely recalibrated to the point where I went 12 months without a single fault which would otherwise result in an automatic 6 month disqualification. This is a real 6 star app. We fell in love with your review ¥! Thank you for your kindness in taking the time to write a few words for Radarbot. These comments are the best reward for our daily efforts. We promise not to let up and keep working hard to make Radarbot the best speed app in the future. There were n improvements. In fact, they made a very bad desktop even worse. I gave up on this app. When the phone is placed on the windshield, the small speedometer in the lower right corner of the screen is difficult to see. If you hide traffic and map (which are useless for app purposes) you get a big blank gray screen and a small in the lower right corner, which is hard to see at best. For a speed measurement application, a large speedometer screen is a must and a no-brainer. The language options are scary and remind me of Microsoft Joe. The app is fine and can be useful, but it needs a serious rethink. Hi. Thanks for the message and honest opinion. It is very important for us to listen to you. Fixed several bugs that appeared in the last update, such as B. Pressing the red button does not exit the app. Note the speedometer improvements. Regarding the voice, you can choose a male or female voice at Tone.radarbot@iteration-mobile.com The developer, Iteration Mobile S.L. notes that the application's privacy practices may include data processing as described below. Please see the developer's privacy policy for more information. The following data may be used to track you across third-party apps and websites: The following data may be collected and linked to your identity: The following data may be collected but not linked to your identity: Location Use Data diagnostics Privacy practices may vary for example depending on the features you use or your age. Learn More Developer Website App Support Privacy Policy Sygic GPS Navigation & Maps is the most advanced navigation app in the world. Many smart navigation features, beautiful 3D offline maps and user-friendly interface give you a unique navigation experience. Buy Sygic GPS Navigation and join over 200 million satisfied drivers. NAVIGATE ANYWHERE, EVEN WITHOUT AN INTERNET CONNECTION. Offline 3D maps of all countries of the world from TomTom and other providers. Free map updates several times a year. GPS navigation with turn-by-turn directions and spoken street names • Millions of points of interest (POIs) • GPS walking navigation with pedestrian directions and points of interest (POIs) • Navigation arrow customization. Try an everyday car, a van or even a formulaAvoid traffic jams with the most accurate, real-time traffic information collected from over 500 million users worldwide. \* STAY SAFE™ Advanced safety features make it easier to drive in unfamiliar areas. Dynamic Lane Assist puts you in the right lane. A head-up display (HUD) projects navigational information onto the car's windshield, making driving at night safer. The dash cam records the road in front of the car and automatically saves the video in the event of an accident. Real View Navigation is an augmented reality feature for an even more comfortable and safer driving experience. With real-time route sharing, you can share your estimated time of arrival and current location on the map. \* Apple CarPlay connectivity - all navigation functions are displayed on the car's integrated display. The dashboard shows your car's performance in real time. • Wrong path warning (in partnership with Bosch)\*\*. If you are driving in the wrong direction or someone is driving in the opposite direction, we will warn you. \* SAVE MONEY ON THE ROUTE • Convenient parking with parking suggestions and up-to-date pricing and availability \* • Set your fuel dose and refuel at the best price with live fuel price information \* • Avoid speeding fines with camera alerts Speed control\* • Save money roaming Charges with offline maps Want to know what it's like to have Premium+? Note 2: DVR, Traffic Sign Recognition and Live View are part of the new SmartCam function. SmartCam combines all camera functions in one. SmartCam is part of our Premium+ subscription. \*\*The wrong path driver feature is available in Sygic GPS Navigation for iOS version 22.2. or higher. For more information about features, see the glossary: . By installing, copying or using this software in whole or in part, you agree to all the terms of this agreement: November 18, 2022 Version 22.5.0 of Satellite Maps is finally out and available for all users. In addition, Sign Recognition now recognizes a No Overtaking sign. We also offer Real View Navigation innovation. The augmented reality feature brings a new design and new features. New Review: I love the graphics and lane challenges in this app. The development team responded immediately and fixed many issues that made it difficult to use the application. Landmarks and places are now searchable. Yesterday, the app was nimble enough to find the best route through a closed freeway with slow traffic and multiple closures in the city center. With Sygic there has never been a drive stall. It takes some getting used to, but it's worth it. First review: There are very few points of interest loaded into the database of this app. To navigate, you need to search for a landmark on Google and then enter the address into Sygic. I like the graphics, but I never found a single place in the application by name, including libraries andNot worth the price. The company has offered to enter every case I've submitted, but won't refund the purchase until it has more relevant tabs and search capabilities. Hello, we are happy to help you with any application issues. Create a support request to: urgent.support@sygic.com, Jaro from customer service. I downloaded this app a few months ago but only used it once or twice because the search bar was terrible. I use Google Maps and have never had a problem finding a place nearby. This app seems to expect you to know the full address you are going to. You can't just type in the name of the restaurant. It's just disappointing. A few days ago I decided to give the app another chance because I liked the idea of augmented reality (which I paid for). I tried it for the first time today and it was a total disappointment. The idea is amazing, but it's hard to tell where the next bend is. The AR screen shows your speed and distance, but no prompts to warn you of descents, turns, NADA! A clue! I didn't have time to land because the sound was off and you just can't see the turns in AR mode. I'm going to triple check if I'm missing a setting because I really want this to work. If not... I will ask for a refund. UPDATE: Still no sound! After you use the internet to try to contact the seller, they send you back again and again. There is no clear way to request a refund. I'm sure I can call iTunes, but why not make it easier? BECAUSE YOU DON'T WANT TO PAY \$\$ FOR THE WRONG PROGRAM! Sometimes customer service is what makes or breaks your business... a non-existent service department hiding behind links that lets you down. I WILL TRY TO CONTACT EVERYONE TO TRY TO GET MY MONEY BACK. Hello, we are happy to help you with any application issues. Create a support ticket at Urgent.Support@sygic.com and make sure you provide as much up-to-date information as possible to ensure resolution to your problem. Hair from customer service. Update: The search function has been greatly improved, but the instructions now leave a lot to be desired. I've noticed that the map on the freeway shows all the lanes in order, only to find that I have to turn less than 1000 feet from the exit, sometimes ending up saying I'm turning right by agreement, only the lane appears. On my last ride, he also kept telling me to go into the car lane, so he showed me how to turn every mile or two; so it was impossible to know when my turn would actually come. It would also be nice to get more specific information about future turns. Finally, why is the information bar at the top sometimes blue and sometimes green? I'm sure there's a reason for this, but I haven't figured it out yet. I currently only use Sygic when I'm in areas with no cell signal, otherwise I use Apple Maps. I used to like Sygic and still hoped they would finally fix all the bugs. If I can get the app to understand where I'm going, that's great, but actually getting the app to recognize an address or location is a pain. at best and a complete failure at worst. At one point you could share an address from Apple Maps and that was great, but then it was removed by Apple or Sygic. I have no idea, but now it's an epic fail. Because I like maps, when I go somewhere I bookmark the place so I can find it again. Hello, we are happy to help with any application issues. Create a support ticket at: urgent.support@sygic.com, be sure to provide as much up-to-date information as possible to ensure the problem is resolved as quickly as possible. Alex from customer service. The developer, Sygic a.s., has announced that the app's privacy policy may include the following data processing.
